PREFACE.

Arrold's First and Second Latin Book was introduced to the American public some five years since, under the editorial care of Professor Spencer. As the system was, at that time, quite new in this country, and comparatively so in England, the American editor did not think it best "to make any material alteration in the original work." The marked favor with which the volume was at once received, and the almost unprecedented success which has since attended it, are a sufficient proof of its excellence. The test of the class-room and the improved methods of instruction have, however, convinced teachers that, with many rare merits, and with a general plan most happily adapted to the wants of the beginner in Latin, it was still, in some important respects, quite incomplete in its execution and details. The present volume, undertaken at the request of the publishers, is the result of an attempt to remove these defects, and thus to render

the work worthy of yet higher favor and success. The entire book has been rewritten and many important additions have been made.

The Latin of the *First and Second Latin Book* has been retained, so far as consistent with our purpose; but as it has been found necessary to add many new selections, care has been taken to secure pure classic Lauin, by resorting exclusively to the pages of Caesar and Cicero.

In the preparation of this book, it has been a leading object with the editor, so to classify and arrange the various topics as to simplify, and, as far as possible, to remove the disheartening difficulties too often encountered by the learner at the very outset in the study of an ancient language. He has accordingly endeavored so to present each new subject as to enable the beginner fully to master it, before he is called upon to perplex himself with its more difficult combinations. The lessons have been prepared with constant reference to the Ollendorff method of instruction, while, at the same time, special pains have been taken to present a complete and systematic outline, both of the grammatical forms and of the elementary principles of the language. An effort has thus been made to combine the respective advantages of two systems, distinct in themselves, but by no means inconsistent with each other.

In the earlier portions of the book, the exercises for translation consist of two paragraphs of Latin sentences and two of English, the first of each being designed to illustrate the particular topic which chances to be the subject of the lesson, and the second to furnish miscellaneous examples on the various subjects already learned. Thus each lesson becomes at once an advance and a review.

For convenience of reference and for the purposes of general review, a summary of Paradigms and an outline of Syntax have been appended to the lessons. The Syntax will be found, it is hoped, to be an improvement, at least in point of classification and arrangement, upon that ordinarily presented in Latin Grammars. In a Second Latin Book, now in preparation—being at once a Reader and an Exercise Book—the editor contemplates a fuller development and illustration of the Latin Syntax, in a series of exercises on the principle of analysis and synthesis.

The present volume, as already intimated, has been prepared mainly from Arnold's First and Second Latin Book; the editor has, however, had before him numerous other works of a kindred character, from some of which he has derived valuable aid. Among these may be mentioned, in addition to the various Latin Grammars in use in this country and in England, Allen's New Latin Delectus; Analysis of Latin Verbs, by the same author; and Pinnock's First Latin Grammar; together with numerous other elementary works, among which the editor is happy to specify the First Latin Book, by Professors M'Clintock and Crooks.

Professor Spencer's edition of Arnold's Latin Prose Compo-

sition, one of the volumes of the excellent Classical Series published by the Messrs. Appleton, has been consulted with much advantage.

For valuable assistance in the preparation of the Syntax, the editor is happy to acknowledge his indebtedness to Greene's Analysis of the English Language.

EXPLANATIONS.

The small numerals above the line in the Exercises refer to Differences of Idiom, page 275; the small letters to Cautions, page 277.

The numerals enclosed in parentheses refer to articles in the body of the work.

In the Exercises, words connected by hyphens are to be rendered into Latin by a single word; as, natural-to-man, hūmānŭs; it-is, est, &c.

INTRODUCTION.

PRONUNCIATION.

The two Methods, the Continental and the English, which at present prevail in the pronunciation of Latin, differ from each other chiefly in the sounds of the vowels; we shall accordingly first state the settled principles in which they agree (as accent, quantity, &c.), and then present the vowel sounds of each separately, hoping, however, that, in this country, the Continental Method will soon commend itself to general favor. With the important merit of uniform consistency, it is, at the same time, the only pronunciation intelligible on the Continent of Europe, the very place where the American scholar will most need his Latin as a medium of communication.

I. LETTERS.

The Latin Language has six characters, or letters, representing vowel sounds, and nineteen representing consonant sounds.

- Rem. 1. The vowel sounds are a, e, i, o, u, and y; the consonants are the same as in English, with the omission of w, which is not used in Latin.
- Rem. 2. Two vowels sometimes unite in sound, and form a diphthong, as in English; e. g., a in Cæsar.
- REM. 3. X and z* are called double consonants; l, m, n, and r, liquids, and the other consonants, with the exception of h and a mutes.

3

IL SYLLABLES.

In the pronunciation of Latin, every word has as many syllables as it has vowels and diphthongs; thus the Latin words, *more*, *vice*, *acute*, and *persuade*, are pronounced, not as the same words are in English, but with their vowel sounds all heard in separate syllables; thus, *mo-re*, *vi-ce*, *a-cu-te*, *per-sua-de*.

IIL QUANTITY.

Syllables are, in quantity or length, either long, short, or common (i. e. sometimes long and sometimes short).

1. A syllable is long in quantity:

- 1) When it contains a diphthong, as the first syllable of cædo.
- 2) When its vowel is followed by j, x, z, or any two consonants, except a mute followed by a liquid; as the second syllables of erexit and magister.
- 2. A syllable is *short*, when its vowel is followed by another vowel, or a diphthong, as the second syllable of *indies*.

Rem. The letter h does not affect the quantity of the preceding vowel.

The quantity of syllables, when not determined by these rules, will be indicated in the vocabularies (and, in some instances, in the exercises) by the dash — when long, by the curve ~ when short, and by the two together ~ when common.

IV. ACCENTUATION.

1. The primary (or principal) accent, or stress of voice, is placed:

1) In words of two syllables, always on the first; as, ho'mo, a man.

- 2) In words of more than two syllables, on the *penult* (the last syllable but one), if that is *long* in quantity; otherwise on the *antepenult* (the last syllable but two); as, $r\bar{u}d\bar{t}'c\bar{t}s$, $con's\bar{u}l\bar{t}s$.
- 2. An additional accent is placed on each second syllable preceding the primary accent; as, dē monstrātūr.

V. SOUNDS OF THE LETTERS.

- I. THE CONTINENTAL METHOD.*
- 1. The Sounds of the Vowels.

The Continental sounds of the vowels are as follows:—

a									\ddot{a}	in	father;	e. g.,	ārīs.
								§ 1.	ā	in	made;	e. g.,	ēdĭt. ămĕt.
е	•	•	•	•	•	•	•	l 2.	ĕ	in	met;	e. g.,	ămĕt.
											me;		
•								<i>§</i> 1.	\bar{o}	in	no; nor;	e. g.,	ōră.
U	•	•	•	•	•	•	•	<i>l</i> 2.	ŏ	in	nor;	e. g.,	ămŏr.
u									ô	$_{\rm in}$	do;	e. g.,	ūnă.
v	_		_ '			_			ē	in	me:	e. ø	nýmphă.

REM. Y is used only in words derived from the Greek.

These sounds are uniformly the same in all situations, except as modified by quantity and accent, (III. and IV.)

2. The Sounds of the Diphthongs.

æ and æ . . . \bar{a} in made; e. g., ætās, cœlŭm. au . . . ou in out; e. g., aurŭm.

REM. The vowels in ei and eu are generally pronounced separately

^{*}For the Continental Pronunciation the editor is indebted to the kindness of Mr. George W. Greene, Instructor in Modern Languages in Brown University.

3. The Sounds of the Consonants.

The pronunciation of the consonants is nearly the same as in English, though it varies somewhat in different countries.

II. THE ENGLISH METHOD.

1. The Sounds of the Vowels *

In the English method, the vowels generally have the long or short English sounds: the length of the sound, however, is not dependent upon the quantity of the vowel, but must be determined by its situation or accent.

- (a) In all monosyllables, vowels have
- 1) The long sound if at the end of the word; as, si, re.
- 2) The short sound if followed by a consonant; as, sit, rem; except post, monosyllables in es, and plural cases in os; as, hos (a plural case).
 - (b) In an accented penult, vowels have
- 1) The long sound before a vowel, diphthong, single consonant, or a mute followed by l, r, or h; as, deus, pater, paters; except tibi and sibi.
 - 2) The *short* sound before a double consonant, or any two single consonants except a mute followed by l, r, or h; as, *bellum*, *rexit*.
 - (c) In any accented syllable except the penult, vowels have
 - 1) The long sound before a vowel or diphthong; as e in éadem.

^{*} The system of vowel sounds here presented is the same as that given in Andrews and Stoddard's Latin Grammar, and, like that, is based upon Walker's Key to the Pronunciation of Greek and Latin Proper Names. The rules, however, unlike those of Andrews and Stoddard, are so prepared as to show the sounds of the vowels, in all their various situations, independently of the division of words into syllables. This, it is hoped, will facilitate their application.

- 2) The short sound before a consonant, as o in diminus: except,
- a) U before a single consonant, or a mute followed by r or h (and perhaps l); as, Púnicus, salúbritas.
- b) A, e, and o, before a single consonant (or a mute before l, r, or h), followed by e or i before another vowel; as, $d\acute{o}ceo$, $\acute{a}cria$.
- (d) In all unaccented syllables, vowels have the short sound; as, cantámus, vígilat: except,
- 1) Final a in words of more than one syllable. This has the sound of ah, as in the word America; e. g., musa (musah).
- 2) Final syllables in *i* (except *tibi* and *sibi*), *es*, and *os*, in *plural cases*; as, *hómini*, *dies*, *illos* (a plural case).
- 3) The first syllable of words accented on the second, when the first either begins with an i followed by a single consonant, or contains i before a vowel; as, $di\acute{e}bus$, $ir\acute{a}tus$.

Rem. E, o, and u, unaccented before a vowel, diphthong, a single consonant, or a mute followed by l, r, or h, are not quite as short in sound as the other vowels in the same situations.

2. The Sounds of the Diphthongs.

Æ and ∞ , like e in the same situation; e. g., Clesar, Daédalus.

Au, as in the English, author; e.g., aurum.

Eu, " neuter; e. g., neuter (both Eng. and Latin).

Ei, as in the English, height; e. g., dein. Oi, "coin; e. g., proin.

Rem. 1. The vowels in ei and oi are generally pronounced separately.

REM. 2. A few other combinations seem sometimes to be used as

diphthongs. U is always the first element of these combinations, and has then the sound of w; as, suade = swade: except, Ui in huic, and cui, which has the sound of long $\bar{\imath}$.

3. The Sounds of the Consonants.

The consonants are pronounced nearly as in English; c and g, however, are soft before e, i, and y, and the diphthongs a and a, and hard in other situations: a is always hard, like a; as, a charta (a).

FIRST LATIN BOOK.

LESSON I.

Parts of Speech.—Proposition.—Subject.—Predicate.

1. In Latin, as in English, words are divided, ascording to their use, into eight classes, called Parts of Speech, viz.: Nouns, Adjectives, Pronouns, Verbs, Adverbs, Prepositions, Conjunctions, and Interjections.

2. These parts of speech, either singly or combined, form propositions or sentences; as, ămās, thou lovest;

puĕr lūdĭt, the boy plays.

- 3. Every proposition, however simple, consists of two parts: (1.) the *subject*, or the person or thing of which it speaks; and, (2.) the *predicate*, or that which is said of the subject: thus, in the proposition, *puĕr lūdit*, *puĕr* (the boy) is the subject of which the proposition speaks, and *lūdit* (plays) is the predicate which is affirmed of the subject.
- 4. In Latin the subject is often omitted, because the form of the predicate shows what subject is meant; thus the proposition $\check{a}m\check{a}s$, thou lovest, consists in Latin of a single word, because the ending $\bar{a}s$, of $\check{a}m\bar{a}s$, shows (as we shall see by and by) that the subject cannot be I, he, or they, but must be thou.
- 5. When a proposition thus consists of a single word, that word is always a verb; e.g., ămăt, he loves.

6. The *analysis* of a proposition consists in separating it into its elements.

Example 1.—Proposition, $Pu\breve{e}r$ (the boy) $l\bar{u}d\breve{u}t$ (plays). $Pu\breve{e}r$ (the boy) is the *subject*, because it is that of which the proposition speaks (3). $L\bar{u}d\breve{u}t$ (plays) is the *predicate*, because it is that which is said of the subject (3).

EXAMPLE 2.—Proposition, Amās (thou lovest).

 $Am\bar{a}s$ is the *predicate*, because it is that which is said of the subject. Thou, the subject in English, is omitted in Latin, because the ending $\bar{a}s$, of the predicate $\bar{a}m\bar{a}s$, fully implies it.

7. Exercise in Analysis.*

Puellă (the girl) cantăt (sings). Puer (the boy) lūdet (will play). Păter (the father) videbit (will see). Māter (the mother) rīdebat (was laughing). Currebat (he was running). Cantābit (he will sing). Lūdebat (he was playing). Arābat (he was ploughing).

LESSON II.

Verbs.—First Conjugation.

8. A VERB expresses existence, condition, or action (generally the existence, condition, or action of some person

^{*} These propositions are to be analyzed according to the examples just given. The object is twofold: first, to fix definitely the distinction between subject and predicate; and, secondly, to show the learner that when the subject is a personal pronoun (English, I, thou, he, &c.), it is generally omitted in Latin. The use of the pronoun to express emphasis or contrast will be considered in another place.

or thing, called its subject): as, est, he is; dormit, he sleeps (is sleeping, or is asleep); ămăt, he loves.

- 9. When a verb expresses simply its meaning, without reference to any person or thing, as $\check{a}m\bar{a}r\check{e}$, to love, it is said to be in the *Infinitive Mood*.
- 10. When a verb expresses its meaning in the form of an assertion or question, referring to its subject, as ămăt, he loves, it is said to be in the *Indicative Mood.**
 - 11. A verb may represent its subject,
 - 1) As acting in *present* time; as, *ămăt*, he loves. It is then said to be in the *Present Tense*.
 - 2) As acting in past time; as, ămābăt, he was loving. It is then said to be in the Imperfect Tense.
 - 3) As acting in *future* time (i. e., about to act); as, $\check{a}m\bar{a}b\check{i}t$, he will love. It is then said to be in the *Future Tense*.*
 - 12. Λ verb may represent its subject,
 - 1) As speaking of himself; as, amo, I love, and then both subject and verb are said to be in the First Person.
 - 2) As spoken to; as, $\check{a}m\bar{a}s$, thou lovest, and then both subject and verb are said to be in the Second Person.
 - 3) As spoken of; as, ămăt, he loves, and then both subject and verb are said to be in the Third Person.
 - 13. A verb may represent its subject,
 - As consisting of only one person or thing; as, ămăt, he, she, or it loves, and then both subject and verb are said to be in the Singular Number.

[•] The other moods and tenses will be noticed ir another place.

- 2) As consisting of more than one person or thing; as, amant, they love; and then both subject and verb are said to be in the Plural Number
- 14. Every verb consists of two parts, viz.:
 - 1) The Root, or that part of the verb which remains unchanged throughout the various moods, tenses, numbers, and persons; as, ăm in ămārĕ, ămŏ, ămăt, and ămābĭt.
 - 2) The Endings which are added to this root, to form the moods, tenses, numbers, and persons; thus, in the forms just noticed—viz., ămāre, ămō, ămăt, and ămābit—the endings are, ārē, ō, ăt, and ābīt.
- 15. Some verbs have the infinitive in are; as, amare, to love. These are said to be of

The First Conjugation.

16. In verbs of this conjugation,

1) The root is found by dropping the infinitive

ending ārě; as, ămārě; root, ăm.

2) The third persons singular of the present, imperfect, and future tenses of the indicative are formed by adding to this root the following endings:

> Present. Imperfect. Future. ābăt, ăt, ābĭt. PARADIGM.

Amārĕ, to love: root, ăm.

he, she, or it loves (or, is loving). Am-ăt,

Imperfect. Am-ābăt, " " was loving.

" will love (will be loving). Am-ābĭt. Future.

17. VOCABULARY.

Latin.	Meaning.	Key-words.*
Amarě,	to love	(amorous).
Ararě,	to plough	(arable).
Cantarě,	to sing	(canto).
Lăborare,	to labor	(labor).
Vigilare,	to watch	(vigilant).

18. Exercise.

Laborat.† 2. Cantat. 3. Arat. 4. Arābat.
 Amābat. 6. Vigilābat. 7. Vigilābit. 8. Cantābit.
 Laborābit. 10. Vigilat. 11. Laborābat. 12. Amābit. 13. Amat. 14. Cantābat. 15. Arābit.

LESSON III.

First Conjugation—continued.

19. Vocabulary.

Ambŭlārĕ,	to walk	(ambulatery).
Jūrārĕ,	to swear.	
Pūgnārě,	to fight	(pugnacious).
Saltārč,	to dance.	
Spērārě,	to hope.	
Vŏcārĕ,	to call	(vocation).

^{*} These Key-words, derived from the Latin, are introduced partly as a key or help to the learner, in fixing the meaning of the Latin, and partly as specimens of English derivatives of Latin origin.

[†] The subject of each of these verbs may be, in English, either he, she, or it. The ending, at, shows the number and person of the subject, but not its gender (see Paradigm). When the subject is thus omitted in Latin, we can usually determine from the connection which subject to use, just as in English we determine the meaning of the pronoun they, which may represent either things or persons, and either males or females. In these exercises the pupil may use he as the subject.

20. In English, the tenses, numbers, and persons of verbs are indicated by certain words or sugns; as,

Present. Imperfect. Future.
He loves, He was loving, He will love.

In Latin, however, no such signs are used; but their place is supplied by the endings of the verb. Hence, in translating English into Latin, omit these signs and express the tense, number, and person of the verb by the proper endings; e.g.:

Present. Imperfect. Future.
Eng. He loves, He was loving, He will love.
Lat. Amat, Amābat, Amābit.

21. Exercises.

LESSON VII.

Verbs.—Four Conjugations.—Plural Number.

- 34. The Four Conjugations already noticed contain all the regular verbs of the Latin language: hence,
 - In any regular verb, the root is found by dropping the infinitive ending of the conjugation to which it belongs. These endings in the four conjugations are as follows:

a) These endings, it must be observed, differ from each other only in the vowel before $r\check{e}$, which is called the *characteristic* vowel of the conjugation. The characteristic vowels in the four conjugations are as follows:

Conj. I. Conj. II. Conj. III. Conj. IV.
$$\bar{a}_{i}$$
, \bar{e}_{i} , \check{e}_{i} , \check{e}_{i} , $\bar{1}$.

Rzm.—These vowels occur so frequently in their respective conjugations, that they are called favorite vowels of the conjugations. The third conjugation has also it as a favorite vowel, as in the present ending, it; e. g., regit, he rules.

2) In any regular verb, the third persons singular of the present, imperfect, and future tenses of the indicative are formed by adding to the root the endings of the conjugation to which the verb belongs. These endings in the four conjugations are as follows:

Pres.	Imperf.	Fut.
ăt,	ābăt,	ābit.
ĕt,	ēbăt,	ēbĭt.
ĭt,	ēbăt,	ĕt.
ĭt,	iēbăt,	iĕt.
	ăt, ĕt, ĭt,	ăt, abăt, ĕt, ēbăt, ĭt, ēbăt,

35. In any regular verb, the third persons plural, in the tenses already noticed, are formed by simply inserting n before t in the endings of the third singular.

Exc.—If i immediately precedes t, it must be changed, in the fourth conjugation, into iu; as, audit, he hears; audiunt, they hear: and in the other conjugations into u; as, $\check{a}m\bar{a}b\check{u}t$, he will love; $\check{a}m\bar{a}bunt$, they will love.

They were learning. 32. They were instructing. 33. They will sing. 34. They will weep. 35. They will read. 36. They will come.

LESSON VIII.

Nouns.—Nominative Case.

37. In Latin, as in English, all names, whether of persons, places, or things, are called *Nouns*; as, *Casăr*, puĕr, a boy, &c.

- Rem. 1.— Names of individual persons or objects are called proper nouns; as, Casăr; Romă, Rome.
- Rem. 2.—Names applicable to persons or objects, not as individuals, but as members of a class, are called common nouns; as, equüs, a horse (a name applicable to all animals of this class).
- 38. All nouns have gender, number, person, and case.
- 39. The Gender of a noun is either masculine, feminine, common, or neuter.
- 40. In Latin, as in English, all nouns denoting objects which have sex, except such names of animals as are applicable to both sexes, are,
 - 1) Masculine, when they denote male beings; as, homines, men; puer, a boy; leones, liens.
 - 2) Feminine, when they denote female beings; as, mŭliër, a woman; puellă, a girl; leænă, a lioness.
 - 3) Common, when they apply alike to both sexes; as, părens, a parent (either male or female); testis, a witness (either male or female).
- 41. When gender is employed to denote sex, as in the cases just noticed, it is called *natural* gender.
- 42. In nouns denoting objects without sex (neuter in English), and in most names applicable to animals of both sexes, the gender in Latin is entirely independent of sex, and is accordingly called grammatical gender.

Some of these nouns are grammatically masculine; some, grammatically feminine; and some, grammatically neuter.

- 43. The grammatical gender of nouns is determined partly by their signification, but principally by their endings.
- 44. The general rules for ascertaining the grammatical gender of nouns, independently of their endings, are:

- Most names of rivers, winds, and months are masculine; as, Rhēnŭs, the Rhine; austĕr, the south wind; Aprīlĭs, April.
- 2) Most names of countries, towns, islands, and trees are feminine; as Ægyptŭs, Egypt; Rōmă, Rome; Dēlös, name of an island; laurŭs, the laurel-tree.
- 3) Indeclinable nouns,* and clauses used as nouns, are neuter; as, fūs, right; nihil, nothing.

Gender, as determined by the endings of nouns, will be noticed in connection with the several declensions.

- 45. The Numbers and Persons are the same in Latin as in English. The first person denotes the speaker; the second, the person spoken to; and the third, the person spoken of. The singular number denotes one; and the plural, more than one.
- 46. The Cases of Latin nouns are six in number, viz.: Nominative, Genitive, Dative, Accusative, Vocative, and Ablative.
- 47. The case of a noun is indicated by its ending; and the formation of its several cases is called *De clension*.
- 48. The *Nominative Case* corresponds to the nominative in English, both in name and use; e. g.,

Puĕr lūdĭt, the boy plays.

49. RULE OF SYNTAX.†—The subject of a finite (i. e. not infinitive) verb is put in the nominative.

Rem. 1.—Thus, in the example, puer is in the nominative by this rule, Rem. 2.—The subject stands before the verb, as in English.

^{*} Such as have but one form for all cases and both numbers.

[†] Rules for the government and agreement of words are called Rules of Syntax.

50. Rule of Syntax.—A finite verb must agree with its subject in *number* and *person*.

Rem.—Thus, in the above example, lūdit is in the third person singular, to agree with its subject puer.

Determine which of the nouns in the following Vocabularies nave natural gender, and which grammatical, and apply rules.

 8. Caesar was coming.

^{*} Gender is indicated in the Vocabularies by m. for masculine, f. for feminine, c. for common, and n. for neuter.

[†] As the Latin has no article, a noun may be translated, (1) without the article; as, $p\check{a}t\check{e}r$, father: (2) with the indefinite article; as, $p\check{a}t\check{e}r$, a father: (3) with the definite article; as, $p\check{a}t\check{e}r$, the father.

Voc. Pătĕr. Nom. puĕr cădĕt.

Father (or, O father), the boy will fall.

Rem.—In very short sentences, like the above, the vocative may be placed either at the beginning or close; in other cases, however, it is generally preceded by one or more words in the sentence.

56. Rule of Syntax.—The name of the person or thing addressed is put in the vocative.

Rem.—The interjection O is sometimes used before the name addressed, both in Latin and English.

LESSON XI.

Nouns.—Apposition.—Modified Subject.

59. The subject of a proposition may have a noun denoting the same person or thing connected with it to explain or limit its meaning. The subject is then said to be *modified* by the limiting noun; e. g.

Subject not modified.

Subject modified.

Lătīnus rēgnābāt.
 Lātīnus rex rēgnābāt.
 Latinus was reigning.
 Latinus the king was reigning.

Rem. 1.—Rex, in the above example, limits Lătīnus; i. e. it shows that the predicate rēgnābāt is not affirmed of every one who may have borne the name Latinus, but only of Latinus the king. Rex is in the same case as the subject, i. e. nominative, and is said to be in apposition with it.

Rem. 2.—The noun in apposition is generally placed after the noun which it limits, as in the above example; if, however, it is *emphatic*, it is placed before that noun.

LESSON XII.

Nouns.—Genitive Case.—Modified Subject.

62. Nouns in Latin are declined in five different ways, and are accordingly divided into five classes, called Declensions, distinguished from each other by the following

GENITIVE ENDINGS.

Dec. I.	Dec. II.	Dec. III.	Dec. IV.	Dec. V.
ae,	ī,	₩s,	Dec. IV. ūs,	ēī.*

EXAMPLES.

	Nominative.	Genitive.
Dec. I.	Mūsă, a muse,	mūsae, of a muse.
II.	Servus, a slave,	servi, of a slave.
III.	Hŏnŏr, an honor,	honoris, of an honor.
IV.	Fructus, a fruit,	fructūs, of a fruit.
	Dies, a day,	diēī, of a day.
	-	

REM.—The genitive endings are usually added to the word after the ending of the nominative is dropped; but, as this is not always the case, it becomes necessary, in order to decline a noun correctly, to know both the nominative and the genitive: accordingly, both these forms are given in the Vocabularies.

63. The Genitive Case expresses possession, and the various relations denoted by the preposition of, and accordingly corresponds both to the English Possessive, and the English Objective with of; as, regis corona, the king's crown (or the crown of the king); amor gloriae, the love of glory.

64. The subject of a proposition may have a noun denoting a different person or thing connected with it, to explain or limit its meaning. The subject is then said to be modified by such noun; e. g.

Subject not modified.

Subject modified.

 Fīliŭs rēgnābĭt.
 Rēgĭs fīliŭs rēgnābĭt. The son will reign. The son of the king will reign.

Rem.—The genitive regis (of the king), in the above example, modi fies fīliŭs (the son); i.e. it shows that the predicate rēgnābil

^{*} In this ending e is long except in spěī. fǐděī, and rěī.

(will reign) is not affirmed of every son, but only of the son of the king.

- a) In the example, the limiting genitive stands before the noun which it limits. This seems to be the more common order, when no *emphasis* is intended, though we often find it reversed.
- b) If the noun which is limited by the genitive is *emphatic*, or is a *monosyllable*, it generally stands before the genitive; e. g.
 - 1. Cĭcĕrŏ, pătĕr pătriae. Cicero, the father of (his) country.
 - 2. Lex nātūrae.

 The law of nature.

Rem.—In the first example, păter is emphatic, and in the second, lex is a monosyllable; they accordingly stand before their genitives.

- 65. RULE OF SYNTAX.—A noun limiting the meaning of another noun is put,
 - 1) In the same case as that noun, when it denotes the same person or thing; e. g. Lătīnus rex, Latinus the king (59, REM. 1).
 - 2) In the *genitive*, when it denotes a different person or thing; e. g. $R\bar{e}gisfilius$, the son of the king.

LESSON XIII.

Nouns.—Accusative Case.—Direct Object of Predicate.

- 68. EVERY noun consists of two distinct parts, viz:
 - 1) The Root, or that part which remains unchanged throughout the various eases of both numbers, as mūs in mūsu, mūsae, and mūsam.
 - 2) The *Endings*, which are added to the root to form these cases; thus, in the forms just noticed, viz., mūsā, mūsae, and mūsām, the endings are ā, ae, and ām.
- 69. In any noun, of whatever declension,
 - 1) The root may be found by dropping the ending of the genitive singular (62); as, mūsă, Gen. mūsae; root, mūs: servūs, Gen. servī; root, serv: hŏnŏr, Gen. hŏnōrĭs; root, hŏnōr, &e.
 - 2) Any case may be formed (with a few exceptions) by adding to this root the proper ending.
- 79. 1) The Accusative Singular of neuter nouns is the same as the Nominative; e. g., Nom. sceptrum, a sceptre; Accus. sceptrum.
 - 2) The Accusative Singular of masculine and feminine nouns is formed from the root, by adding one* of the following

ACCUSATIVE ENDINGS.

-	Dec. I.	Dec. II.	Dec. III.	Dec. IV.	Dec. V.	
	ăm,	ŭm,	ĕm,	ŭm,	ĕm.	

^{*} If the noun is of the first declension, the learner will, of course, add the ending given for the first declension; if of the second, the ending given for the second; and so on.

EXAMPLES.

	Genitive.	Root.	Ending.	Accusative.
Dec. I.	Mūsae, of a muse;	mūs	-ăm;	mūsăm, a muse.
II.	Servī, of a slave;	serv	-ŭm;	servum, a slave.
III.	Honoris, of an honor;	hŏnō	r-ĕm;	hönörem, an honor.
IV.	Fructūs, of a fruit;	fruct	t-ŭm;	fructum, a fruit.
v.	Dieī, of a day;	di	-ĕm;	diĕm, a day.

- 71. The accusative case corresponds very *nearly* to the English objective, and is used after *transitive verbs* and *certain prepositions*.
- 72. When a verb represents its subject as acting upon some other person or thing, it is said to be *transitive*; and the person or thing upon which the action is exerted, is called its *direct object*; e. g.

Servius impërium administrat. (Servius the government administers.) Servius administers the government.

- 73. In English the object is placed after the verb; thus, government is placed after administers; but in Latin the object precedes the verb; thus, imperium precedes administrat.
- 74. RULE OF SYNTAX.—The *Direct Object* of an action is put in the accusative.

75. Vocabulary.

Acdificare,			to build	(edifice).
Diēs,	Gen.	diēī,	day.	
Dominus,	66	dŏmĭnī,	master, as owner	(domineer).

Laudare,			to praise	(laud).
Monstrare,			to show.	
Mors,	"	mortis, f.	death	(mortal).

Marŭs,	Gen	. mūrī, <i>m</i> .	wall	(mural).

LESSON XIV.

Nouns.—Accusative, continued.—Adverbial Modifiers.

77. Rule of Syntax.—Certain qualifying words, called *adverbs*, are often connected with verbs, merely to modify their meaning; e. g.,

Mīlēs fortītēr pūgnăt.
 Mīlēs non pūgnāt.
 (The soldier bravely fights.)
 The soldier fights bravely.
 The soldier does not fight.

Rem.—In these examples, fortiter (bravely) and non (not) are adverbed modifying pūgnāt. In Latin the adverb generally precedes the verb, as in these instances.

78. Vocabulary.*

Anguis, anguis, c. snake, serpent. Christianus, ī, m. Christian (Christian). Fortitěr. bravely. Lex, legis, f. (legal). Māter, mātrīs, mother (maternal). Nēgligĕrĕ, to disregard (neglect). Non. not. Pastor, pastoris, shepherd (pastor). Pěcūniă, ae, f. (pecuniary). money Servius, a man's name. Serviŭs, ī, voice (vocal). Vox, vocis, f.

79. Exercises.

(a) 1. Servius pugnat.
3. Mors Christiānum non† terret.
4. Agricŏla anguem timēbit.
5. Agricŏla anguem non timēbit.
6. Pater

^{*} In this and the following Vocabularies, either the genitive or its ending is given immediately after each substantive.

[†] In translating non before a verb, place 'not' after the English tense-sign; thus, non terret, does not terrify, or is not terrifying.

filiam audiēbat. 7. Pater filii vocem audiēbat. 8. Mater vocem neglīget. 9. Mater filiae vocem non neglīget.

- 10. Caius legem negligēbat.
 11. Christiānus pecuniam negliget.
 12. Pecuniam negligent.
 13. Puĕrum docent.
 14. Christiānus mortem non timet.

The boy was killing the dog. 7. The boy was killing the shepherd's dog. 8. The dog will not bite. 9. Servius will avenge the death of the king.
- 10. They do not fear death. 11. They will fight bravely. 12. Caius is teaching the boy. 13. The daughter of the queen is singing. 14. They did not hear (were not hearing). 15. They will not disregard the law.

LESSON XV.

Nouns.—Dative Case.—Indirect Object of Predicate.

- 80. The Dative Case in Latin corresponds to the objective with to or for in English; as, mūsā, a muse; Dat. mūsae, to or for a muse.
- 81. The *Dative Singular* of a noun may be formed by adding to its root one of the following

DATIVE ENDINGS.

-	Dec. I.	Dec. II.	Dec. III.	Dec. IV.	Dec. V.
	ae,	ō,	ī,	uī,*	ēī.†

^{*} Neuter nouns of the fourth declension are exceptions, as they have the dative singular like the nominative.

[†] In this ending e is long except in spěī, fíděī, and rěī.

EXAMPLES.

	Genitive.	Root. I	Ending.		Dati	ve.	
Dec. I.	Mūsae, of a muse;	mūs	- ae;	mūsae,	to or	for	a muse.
II.	Servī, of a slave;	serv	- ō;	servō,	66	66	a slave.
III.	Honoris, of honor;	hŏnōı	r - ī;	hŏnōrī,	"	"	an honor.
IV.	Fructūs, of fruit;	fruct	- uī ;	fructui	66	66	a fruit.
V.	Dieī, of day;	di	- ēī;	diēī,	"	"	a day.

82. The person or thing to or for which any thing is, or is done, is called an *indirect object*; e. g.,

Balbus puĕrō viăm monstrăt. (Balbus to the boy the way shows.) Balbus shows the way to the boy.

Rem.—In the example it will be observed that the *indirect object*precedes the *direct*. This is the more common order, though not unfrequently reversed.

83. Rule of Syntax.—Any transitive verb may take the accusative of the direct object and the dative of the indirect object.

84. Vocabulary.

Accūsārě, to accuse. Bellum, ī, n. war. (close). to shut Clauděrě, to found, to build. Conděrě, to give. Dărĕ,* (domestic). Domus, domus, or domi, f. house to pull down, to overthrow. Evertěrě, to declare (as war). Indīcere, lion. Leŏ, leōnis, m. Mīles, itis, m. (rarely f.), soldier (military).

^{*} Dăre is of the first conjugation, with a short, contrary to the general rule.

They will praise the queen's daughter. 13. The king will declare war against the senate. 14. The king will give the city to (his) son.

LESSON XVI.

Nouns.—Ablative Case.—Modified Predicate.

- 86. The Ablative Case in Latin corresponds to the objective with from, by, in, or with in English; as, mūsā, a muse; Abl. mūsā, from a muse, or by, in, or with a muse.*
- 87. The Ablative Singular of a noun may be formed by adding to its root one of the following

ABLATIVE ENDINGS.

Dec. I.	Dec. II.	Dec. III.	Dec. IV.	Dec. V.
ā,	ó,	ĕ,†	ū,	ē.

EXAMPLES.

ĺ	Genitive.	Root.	Endin	g.	Ab	lati	ve.	
Dec. I.	Mūsae, of a muse;	mūs	-ā;	mūsā, f	rom,	in,	&c.,	a muse.
II.	Servī, of a slave;	serv	-ō;	servō,	"	"	66	a slave.
III.	Honoris, of honor;	hŏnō	r - ĕ;	hŏnōrĕ,	"	66	46	honor.

V.	Diēī, of day;	di	-ē;	diē,	66	"	66	day.

88. The predicate may be modified by a noun denoting the time of an action; e. g.,

Hieme ursus dormit. (In winter the bear sleeps.) The bear sleeps (when?) in winter.

89. Rule of Syntax.—The time when is put in the

^{*} The preposition is, however, often expressed before the ablative, as it is before the objective in English.

[†] As an exception to this, a few nouns of the third declension form the ablative in 7, as we shall see by-and-by.

ablative without a preposition (i. e., without any word for the English at, in, &c.)

Rem.—The ablative of time often stands first in a sentence, as in the example.

90. The predicate may be modified by a noun denoting the place of its action; e. g.,

Ursŭs in antrō dormit.
(The bear in a cave sleeps.)
The bear sleeps (where?) in a cave.

91. RULE OF SYNTAX.—The name of a place where any thing is, or is done, when not a town (227), is generally put in the ablative with a preposition.

The pupil, in preparing his exercises, should imitate the order ir the examples, whenever nothing is said on the point.

92. Vocabulary.

Aestas, atis, f. summer. (agriculture). Ager, ăgrī, m. field Antrum, ī, n. cave. Asinus, ī, m. ass. bird (aviary). Avis, is, f. Dilăniare, to tear in pieces. (equestrian). horse Equus, I, m. winter. Hiems, $\check{e}m\check{i}s$, f. (horticulture). garden Hortus, ī, m. In (prep. with abl.), in. Lūcus, ī, m. grove. mountain. Mons, tis, m. meadow. Pratum, ī, n. bear. Ursus, ī, m.

The slave is showing the boy (to the boy) the way. 17. The slave was shutting the gate. 18. The boy will shut the gate.

LESSON XVII.

Nouns.—First Declension.*

- 94. To the First Declension belong all nouns which have the genitive in ae (62). They all end in \tilde{a} (except a few Greek nouns. See 174).
- 95. Latin nouns of this declension are grammatically feminine; unless their gender is determined by their signification, according to previous rules (40, 44).

^{*} Having learned in the previous Lessons the use of the several cases of the Latin language, the pupil will now find little difficulty in mastering the five declensions (62) in all the cases of both numbers.

- 96. We have already learned that the root of a noun may always be found from the genitive singular (69, 1), but, as it may also be formed without much difficulty from the nominative, it will be well for us to notice, in connection with the different declensions, the manner in which this may be done.
 - 97. In the First Declension,
 - 1) The root may be found by dropping the nominative ending \check{a} , as $m\bar{u}s\check{a}$; root, $m\bar{u}s$ (69, 1).
 - 2) Any noun may be declined (i. e., all the cases of both numbers may be formed) by adding to the root the following

CASE-ENDINGS.

The slave will open (his) master's letters.

LESSON XVIII.

Nouns.—Second Declension.—Nouns in us and um.

- 100. To the Second Declension belong all nouns which have the genitive singular in $\bar{\imath}$ (62). They end in $\check{u}s$, $\check{u}m$, $\check{e}r$, and $\check{i}r$ (except a few Greek nouns. See 174).
- 101. In this declension nouns in $\check{u}m$ are grammatically neuter; and the rest (with a few exceptions*) are grammatically masculine; unless their gender is determined by their signification, according to previous rules (40, 44).
- 102. In nouns in $\check{u}s$ and $\check{u}m$, of this declension, the root is found by dropping the nominative ending; as, $serv \cdot \check{u}s$, a slave; root, $serv : r\bar{e}gn \check{u}m$, a kingdom; root, $r\bar{e}gn$.
- 103. Nouns in ŭs are declined by adding to the root the following

CASE-ENDINGS.

	Nom.	Gen.	Dat.	Accus.	Voc.	Abl.
Sing.	ŭs,	ī,	ō,	ŭm,	ĕ,†	ō,
Plur.	ī,	ōrŭm,	īs,	ōs,	ī,	īs.

- * It has not been thought best to burden the memory of the learner with lists of exceptions, at this early stage of his study. Accordingly, general rules, covering the great majority of cases, are given for immediate and constant use; thus the pupil may fix the general principles of the language, and become better prepared to understand and recollect the exceptions as they occur in his lessons. Such exceptions, whether pertaining to gender or other subjects, will be marked in the Vocabularies.
- † The vocative singular, in nouns in $\check{u}s$ of this declension, is not like the nominative (see 55 and note). Proper nouns in $i\check{u}s$ drop the ending \check{e} in the vocative singular; as, Tullius (proper name), Voc. Tulli. Filius, a son, and $g\check{e}nius$, a guardian angel, also drop the ending \check{e} in the vocative singular.

PARADIGM.

Singular.	Plural.
Nom. Serv-ŭs, a slave.	Nom. Serv-ī, slaves.
Gen. Serv-ī, of a slave.	Gen. Serv-ōrum, of slaves.

Voc. Serv-ĕ, O slave.	Voc. Serv-ī, O slaves.
Abl. Serv-ō, from, by a slave.	Abl. Serv-īs, from, by slaves.

Rem.—It will be well for the pupil to accustom himself to compare the several cases with each other, and to associate together such as are alike, or nearly so.

104. Nouns in $\tilde{u}m$ are declined by adding to the root the following

NEUTER CASE-ENDINGS.

REM. 2.—Neuters in \(\tilde{u}m\) are declined like masculines in \(\tilde{u}s\) of this declension, except in the cases just mentioned (nom., acc., and voc.). Compare paradigms.

LESSON XX.

Adjectives of the First and Second Declension.

110. The Adjective is that part of speech which is used to qualify substantives; as, $b\check{o}n\check{u}s$, good; $m\bar{a}gn\check{u}s$, great. .

111. The form of the adjective often depends, in part, upon the gender of the noun which it qualities;

- e. g., Bŏnŭs puĕr, a good boy; Bŏnă puellă, a good girl; and Bŏnŭm rēgnum, a good kingdom. Thus, bŏnŭs is the form of the adjective when used with masc. nouns, bŏnă with fem., and bŏnŭm with neuter.
- 112. These three forms of the adjective are declined like nouns of the same endings. Thus, the masculine is declined like servus (103), and is accordingly of the second declension; the feminine like mūsă (97), and is of the first declension; and the neuter like rēgnum (104), and is of the second declension.

Rem.—Adjectives like the above are called adjectives of the First and Second Declension, because they are declined like nouns of these declensions; the masc and neut being declined like nouns of the second declension, and the fem. like those of the first.

113. Some adjectives of this declension have the nom. and voc. sing. in ĕr, like nouns in ĕr of the second declension. These, in all their other forms, are de-

clined like $b\check{o}n\check{u}s$ in the Paradigm above, with the exception, that most of them drop \check{e} before r of the root in all genders.

REM.—The following adjectives have the genitive singular in \$\tilde{i}\$ is generally short in alterius), and the dative singular in \$\tilde{i}\$ in all genders, viz.: \$\tilde{a}li\tilde{u}s\$, another; null\tilde{u}s\$, no one; \$\tilde{s}li\tilde{u}s\$, alone; \$\tilde{t}\tilde{u}s\$, the whole; \$ull\tilde{u}s\$, any; \$\tilde{u}n\tilde{u}s\$, one; alt\tilde{e}r\$, the other; neut\tilde{e}r\$, neither; and \$\tilde{u}t\tilde{e}r\$, which (of the two).

114. RULE OF SYNTAX.—Adjectives agree with the nouns which they qualify, in gender, number, and case; e. g.,

Mātĕr bŏnăm fīliăm laudăt.

(The mother (her) good daughter praises).

The mother praises her good daughter.

REM. 1.—The adjective bonom is in the feminine accusative singular, to agree with its noun filiam.

Rem. 2.—The position of the adjective seems to depend principally upon *emphasis*; and accordingly the adjective *precedes* or *follows* its noun, according as it is or is not emphatic. In the example, bönüm is emphatic.

Rem. 3.—Meŭs, my; tuŭs, your (or thy); suŭs, his, her, &c., though called adjective pronouns (273 and 295), are in declension and agreement really adjectives. They usually follow their nouns: e.g.,

Mŭliër ancillăm suăm excităt.

(The woman maid her awakens.)
The woman awakens her maid-

LESSON XXI.

Adjectives of the First and Second Declension, continuea.

117. THE noun which the adjective qualifies is often omitted in Latin; and then in translating into English the word man must be supplied, if the adjective is masc. sing.; woman, if fem. sing.; and thing, if neuter sing.; e. g.,

above example (Müliër ancillăm suăm excităt), suăm means her, because the subject măliër is fem. sing.; with a masculine subject it would mean his, and with a plural subject, their, &c.

Avārus pēcuniam amat. (The avaricious (man) money loves.)
The avaricious man loves money.

Rem.—After a plur. adjec. the noun is sometimes expressed and sometimes omitted in the Eng. translation; thus, ăvārī may be translated avaricious men, or simply the avaricious.

- 118. When a noun is limited by a genitive, one or both nouns may be qualified by an adjective; e. g.,
 - Māgnă rēgĭs cŏrōnă.
 (The great of the king crown.)
 The king's great crown.
 - Māgnă bŏnī rēgĭs cŏrōnă.
 (The great of the good king crown.)

LESSON XXII.

Nouns and Adjectives.—First and Second Declension, continued.—Price, Value, and Degree of Estimation.

121. The predicate of a proposition may be modified by a noun or adjective denoting *price*, value, or degree of estimation; e. g.,

1. Avārus pātriam auro vendet.

(The avaricious (man) (his) country for gold will sell.)
The avaricious man will sell his country for gold.

2. Avārus pēcuniam māgnī aestimat.

(The avaricious (man) money at a great (price) values.)
The avaricious man values money at a great price
(cr highly).

122. RULE OF SYNTAX.—Price, when expressed by nouns, is generally put in the ablative, and when expressed by adjectives, generally in the genitive.

Rem. 1.—The genitive of a few nouns and the ablative of a few adjectives sometimes occur in expressions of price and value.

REM. 2.—In example 1. the noun aurō is in the ablative, and in example 2. the adjective māgnī is in the genitive, by the above rule.

LESSON XXIII.

Nouns.—Third Declension.—Class I.

- 125. To the *Third Declension* belong all nouns which have the genitive singular in is. They end in a, e, i, o, y, c, l, n, r, s, t, x, and may be divided into four classes:
 - 1) Those which have the root the same as the nominative singular (except, in a few instances, the omission or change of the radical vowel): as, mulier, a woman; root, mulier.
 - 2) Those which form the root by adding a single letter to the nominative singular: as, leŏ, a lion; root, leōn.
 - 3) Those which form the root by dropping the ending of the nominative singular: as, *urbs*, a city; root, *urb*.
 - 4) Those which form the root by changing the ending of the nominative singular: as, piĕtās, piety; root, piĕtāt.
- 126. CLASS I.—This class comprises nouns in c, *l, n, r, t, and y. These either have the root the same as the nominative singular, or form it (with a few exceptions) by one of the following slight vowel changes:
 - 1) Nouns in ter and ber generally drop e in the root: as, păter, a father; root, pătr.
 - 2) Nouns in ĕn generally change ĕ into ĭ in the root: as, flūmĕn, a river; root, flūmĭn.
 - 3) Nouns in $\check{u}t$ change \check{u} into \check{i} in the root: as, $\check{c}\check{a}\check{p}\check{u}t$, a head; root, $\check{c}\check{a}\check{p}\check{i}t$.

^{*} There are only two nouns with this ending, one of which belongs to Class II.

- Rem.—The quantity of the radical vowel is sometimes changed; this is the case in most nouns in $\check{a}l$ and $\check{o}r$, which generally lengthen the vowel in the root.
- 127. Neuter nouns of this declension have the nominative, accusative, and vocative singular alike, and are declined in the other cases by adding to the root the following

Nouns.—Third Declension.—Class III.

- 134. CLASS III. comprises nouns of the third declension in bs, ms, ps, x (= cs or gs), is, ys, e, a few in i,* and a few in es. They form the root by dropping the nominative ending.
 - 1) Nouns in bs, ms, ps, and ys, drop s: as, urbs, a city; root, urb; hiems, winter; root, hiem.
 - Nouns in x (=cs or gs) drop the s in x: as, vox (cs), a voice; root, vōc; rex (gs), a king; root, rēg.

^{*} Nouns in i are of Greek origin: most of these are indeclinable; a few form the root by dropping i, and a few by adding t (131, 1).

Nouns.—Third Declension.—Class IV.

- 137. CLASS IV. comprises nouns of the third declension in as, os, us, ls, ns, rs, and most of those in es. These form the root by changing s into r, t, or d.
 - 1) Nouns in as, ls, ns, rs, and most of those in es, generally change s into t: as, piĕtās, piety; root, piĕtāt: mons, a mountain; root, mont: ăbiēs, a fir-tree; root, ābiēt: mīlĕs, a soldier; root, mīlĭt. (See Rem. 2, below.)
 - REM. 1.—Masculines in as, of Greek origin, insert n before t in the root; as, Wephās, an elephant; root, Wephant.
 - REM. 2.—Many nouns in es change e into i, before t, in the root: as, milés; root, milit.
 - 2) Nouns in os and us generally change s into r or t: as, flōs, a flower; root, flōr: săcerdōs, a priest; root, săcerdōt: virtūs, virtue; root, virtūt: gĕnŭs, a kind; root, gĕnĕr: tempŭs, time; root, tempŏr.

138. The Latin, like every other language, has certain forms of expression peculiar to itself, called *Idioms*:* e. g.,

Aliquid † temporis,	something of time some time	(Lat. Idiom).
Anquia temporis,	some time	(Eng. Idiom).
Multum † bonī,	much of good much good	(Lat. Idiom).
Bruitum Doni,		(Eng. Idiom).
Quantum † voluptātis,	how much of pleasure	(Lat. Idiom).
Quantum voiuptatis,	how much pleasure	(Eng. Idiom).
Nihil stabilitatis,	5 nothing of stability	(Lat. Idiom).
mini stautitatis,	no stability	(Eng. Idiom).

Rem.—These (†) are neuter adjectives used as nouns; they govern the genitive by the rule already given (65).

^{*} These should be carefully compared with the corresponding English. A table presenting the *Differences of Idiom* between the Latin and English is inserted in this volume for the benefit of the learner. See p. 275.

LESSON XXVII.

Nouns.—Third Declension, continued.—Genitives in ium.—Gender.

- 141. It has already been mentioned (128, Rem.) that some nouns of the third declension have the genitive plural in $i\check{u}m$ instead of $\check{u}m$. These are,
 - Neuters in e, al, and ar: as, mărĕ, măriŭm, ănĭmăl, ănĭmāliŭm.
 - 2) Nouns in is and es of Class III.: as, hostĭs, hostiŭm; nūbēs, nūbiŭm.
 - 3) All monosyllables in s or x preceded by a consonant: as, urbs, urbium; arx, arcium.
 - 4) Nouns in ns and rs (though in these $\tilde{u}m$ is sometimes used): as, cliens, clienti $\tilde{u}m$; cohors, cohorti $\tilde{u}m$.

Rem.—The use of $i\bar{u}m$ in words not included in the above classes must be learned from observation.

142. The gender of nouns of the third declension, when not determined by their signification (40, 44), may generally be ascertained from their *endings*, by the following

RULES FOR GRAMMATICAL GENDER.

1) Masculines.—Most nouns in er, or, os es, increasing in the genitive, and o, except do, go,

- and io, are masculine; e. g., āēr, air; hŏnŏr, honor; flōs, a flower; pēs (gen. pĕdĭs), a foot; sermŏ, a discourse.
- 2) Feminines.—Most nouns in do, go, io, as, is, ys, aus, s preceded by a consonant, x, and es not increasing in the genitive, are feminine; e. g., ărundŏ, a reed; ĭmāgŏ, an image; ōrātiŏ, an oration; aestās, summer; turrĭs, a tower; laus, praise; hiems, winter; lex, a law; nūbēs (gen. nūbīs), a cloud.
- 3) Neuters.—Most nouns in a, e, i, y, c, l, n, t, ar, ur, and us, are neuter; e. g., mărĕ, a sea; poēmă, a poem; lāc, milk; ănĭmăl, an animal; flūmĕn, a river; căpūt, a head, &c.

For exceptions, see Table of Genders (579).

143. Vocabulary.

Amīcus, ī,* friend (amicable).

Anīmus, ī, mind, soul.

Carpĕrĕ, to gather, to pluck.

Flos, orĭs, flower (floral).

- 5. Servus urbis portas claudit. 6. Servi domĭnum suum vindicābunt. 7. Puer patris vocem audit. 8.

^{*} Gender, when not given, must be determined by previous rules.

Puĕri patrum voces audient. 9. Lupus haedum dilaniābat. 10. Haedi lupos timent.

- (b) 1. The boys are gathering flowers. 2. He will pluck the beautiful flower. 3. The dog will fear the lion. 4. Dogs fear lions. 5. The girl will waste much time. 6. Your father will lose much time. 7. The indolent lose much pleasure. 8. The priests are praising the king.

LESSON XXVIII.

Nouns.—Third Declension.—Formation of Cases from each other.

- 145. 1) In any noun of the third declension, all the cases, except the nominative and vocative singular (and the accusative sing. in neuters), can be readily formed from each other, by a simple change of the endings: thus, the accusative sing. hŏnōrĕm gives (by a change of ending) the dat. hŏnōrē, or the dat. and abl. plur. hŏnōrībŭs, or any other case which may be desired.
 - 2) The nominative and vocative singular (and acc. sing. in neuters) can generally be formed from any other case, in some one of the following ways:

- a) By dropping the ending of the given case: as, hŏnōrĕm,* Nom. hŏnŏr.†
 - REM. 1.—This applies to many nouns whose root ends in l, n, or r, and to a few with the root in it.
 - Rem. 2.—I is changed before t into ŭ, and before n into ĕ; and ĕ is inserted before r when preceded by t or b (126, 1); e. g., Gen. căpitis; root, căpit; Nom. căpăt. Gen. flūminis; root, flumin; Nom. flūmēn. Gen. patris; root, patr; Nom. pătēr.
- b) By changing the ending of the given case into s, ēs, ĭs, (or for neuters into) ĕ: as, urbĭs, Nom. urbs; nūbĕm, Nom. nūbēs, &c.
 - REM. 1.—This applies to most nouns of this declension.
 - REM. 2.—T, d, or r, at the end of the root, is dropped before s, and is changed into ĕ; cs or gs will of course be written x; e. g., piĕtātēm, Nom. piĕtās (t dropped before s); mīlitēm, Nom. mīlēs (t dropped before s, and i changed into ĕ); rēgĕm, Nom. rex (regs. rex).
- c) By changing the ending of the given case, together with er or or, as the last syllable of the root, into us: as, generis, Nom. genus.
 - Rem.—This applies only to a few of those words whose root ends in er or or.
- 146. The predicate of a proposition may be modified by a noun denoting the manner or cause of its action, or the means or instrument employed; e. g.,

Irăm meăm dōnō plācābĭt.

(Anger my with a gift he will appease.)

He will appease my anger with a gift.

147. Rule of Syntax.—The cause or manner of an

^{*} The acc. sing. is used here, though any other case would do equally well.

[†] The nom. and voc., it will be remembered, are the same in form.

action, and the means or instrument employed, are expressed by the ablative.

Rem.—In the above example, $d\bar{o}n\bar{o}$ expresses the means employed, and is accordingly in the ablative.

LESSON XXIX.

Adjectives.—Third Declension.

- 150. Adjectives of the third declension may be divided into three classes, viz:
 - 1) Those which have three different forms in the nominative singular (one for each gender).
 - 2) Those which have two (the masc. and fem. being the same).
 - 3) Those which have but one (the same for all genders).
- 151. Adjectives of the third declension are declined in their several genders like nouns of the same declension, gender, and ending. It must, however, be observed,
 - 1) That those which have only one form in the nominative singular have the abl. sing. in \check{e} or $\bar{\imath}$, and the rest, with the exception of comparatives, in $\bar{\imath}$ only.
 - 2) That all except comparatives have, in the plural, the nom., acc., and voc. neuter in iă, and the genitive in iăm.

CLASS I .- THREE TERMINATIONS.

152. Adjectives of the first class have in the nominative singular the masculine in $\check{e}r$, the feminine in $\check{s}s$, and the neuter in \check{e} .

LESSON XXX.

Adjectives, continued.—Nouns.—Fourth Declension.

157. ADJECTIVES are either of the first and second declension, or of the third only: those of the first and second declension are declined in the masculine and neuter like nouns of the second declension, and in the feminine like nouns of the first; those of the third declension are declined throughout like nouns of the third. (See Lesson XXIII.)

[†] In adjectives in $\tilde{\epsilon}r$, the masc. nom. sing. is generally the root ($\tilde{\epsilon}$ is sometimes dropped): $\tilde{\epsilon}r$, therefore, is not properly a case-ending; it is given merely to show the termination of the nom. and voc. sing, without regard to the root (107).

[†] The ör here given in connection with the case-endings belongs to the root; in the nom., acc., and voc. of the neut. sing., it is changed into üs.

t Neut. like nom. § This ending is used only in a few words.

REM.—The fifth declension comprises only a few words, and of these few, only two,—diēs, a day, and rēs, a thing, are complete in the plural.

LESSON XXXIII.

Verbe.—Essĕ, to be. Predicate, Essĕ, with a Noun or an Adjective.

178. Esse, to be, is an irregular verb (i. e., it does not belong to either of the four conjugations already noticed), and gives us in the third persons of the present, imperfect, and future tenses, the following

PARADIGM.

	Sing	ular.	Plural.
Present.	Est, he, she	o, or it is,	Sunt, they are,
Imperfect.	Erăt, " "	" was,	Erant, " were,
Future.	Erit, " "	" will be.	Erunt, " will be.

179. The predicate of a proposition is sometimes expressed by the verb esse (to be), with a noun or an adjective; e. g.,

Terră est rŏtundă. The earth is round.

REM. 1.—In this example, the predicate is not simply est, but est rotundă; for the assertion is not that the earth is (i. e. exists), but that the earth is round.

Rem. 2.—The adjective rotundă agrees with the subject terră in gender, number, and case, by the rule already given. (114).

> Plūrimae stellae solēs sunt. (Very many stars suns are.) Very many stars are suns.

REM.—Here the predicate is soles sunt.

180. RULE OF SYNTAX.—A noun in the predicate after esse is put in the same case as the subject when it denotes the same person or thing.

REM.—In example 2, soles is in the nominative by this rule.

181. Rule of Syntax.—The adjectives dīgnus, indīgnus, contentus, praedītus, frētus, and līber, take the ablative; e. g.,

Virtus parvō contentă est. (Virtue with little content is.)
Virtue is content with little.

Rem.—Parvō in this example is a neut, adj. used as a noun; it is put in the ablative after contentă, by the rule just given.

182. Vocabulary.

Arbor, oris, f.	tree	(arbor).
Beātus, ă, um,	happy	(beatitude)
Candidus, ă, ŭm,	white	(candid).
Contentŭs, ă, ŭm,	content, contented.	•
Culpă, ae,	blame, fault	(culpable).
Dīgnŭs, ă, ŭm,	worthy	(dignity).
Essě,	to be.	
Est,	is, it is.	
Făcĕrĕ,*	to do, to make.	
Florērĕ,	to flourish.	
Frētus, a, um,	relying on.	
Indīgnŭs, ă, ŭm,	unworthy	(indignity).
Laus, dis,	praise	(laud).
Lībēr, ĕră, ĕrŭm,	free	(liberty).
Nēmŏ (ĭnis,†)	nobody, no one.	
Nix, nivis,	snow.	
Nurquăm,	never.	
Parvúm (neut. adj.),	little, a little.	
Praeditŭs, ă, ŭm,	endued with.	
Quăm,	how.	
Quăm multī, ae, ă,	how many.	
Sempěr,	always.	
Vīrēs, vīriŭm, plur. of vīs,	strength.	
Vītă, ae,	life ot	(vital).

^{*} This verb, together with some others of the third conjugation, has the imperfect and future like verbs of the fourth conjugation.

[†] The genitive neminis and ablative nemine are not in good use.

183. Exercises.

- (a) 1. Nix est candida.

LESSON XXXIV.

Verbs.—Infinitive as Subject.—Genitive with Esse in the Predicate.

184. An infinitive mood (with the words belonging to it) (9) may be used as a noun, and thus become the subject of a verb. When thus used it is in the neuter gender (44, 3), and of course takes the adjectives in agreement with it in the same gender; e. g.,

Diff ĭcĭlĕ est jūdĭcārĕ.

(Difficult (it) is to judge.)

It is difficult to judge, or, To judge is difficult.

Rem.—Here jūdicārē (to judge) is the subject of the proposition, for it is that of which the predicate difficile est (is difficult) is affirmed. It is in the nominative case, and subject of the verb est, and the adjective difficile agrees with it.

185. When the noun in the predicate after esse does not denote the same person or thing as the subject, it is put in the *genitive*; e.g.,

Christiānī est nēmĭnĕm viŏlārĕ.

(Of a Christian it is nobody to wrong.)

It is the duty (or part) of a Christian to wrong nobody.

Rem. 1.—In this example the subject is nēmĭnēm viölārē, and the predicate, Christiānī est.

REM. 2.—Combining articles 180 and 185 we have the following

186. RULE OF SYNTAX.—A noun in the predicate, after the verb esse, is put,

- 1) In the same case as the subject when it denotes the same person or thing; e. g., Cĭcĕrŏ ĕrăt consŭl, Cicero was consul.
- In the genitive when it denotes a different person or thing; e. g., Christiānī est nēminēm viŏlārē, it is the duty of a Christian to wrong nobody.

187. In rendering into English, when a genitive follows any part of the verb esse (as est, ĕrăt, ĕrĭt, &c.), such a substantive as duty, part, mark, business, &c., must be supplied.

English Idiom.

Latin Idiom.

 - Rem. 1.—In English, when an infinitive mood is the subject of a proposition, the pronoun it is used before the verb is; hence, in translating such sentences into Latin, this pronoun it, which represents, as it were, the coming infinitive or clause, must be omitted.

- (b) 1. It is a great (thing) not to fear death.⁶ 2. It is easy to err. 3. It is (the duty)⁷ of a Christian to keep (his) word. 4. It is (the part) of a wise (man) to keep the laws.

LESSON XXXV.

Verbs.—Tenses for Completed Action.—First, Second, and Fourth Conjugations.

- 190. The tenses which we have thus far used, viz., the *present*, *imperfect*, and *future*, represent the action of the verb as continuing (11), i. e., as *not completed*. There are also three tenses for *completed* action, viz.:
 - 1) The *Perfect*, which represents the action as completed in present time, i. e., as just completed; e. g., ămāvit, he has loved.
 - 2) The Pluperfect, which represents the action as completed in past time; as, ămāvěrăt, he had loved.
 - 3) The Future Perfect, which represents the action as completed in future time; as, amāverit, he will have loved.
- 191. The tenses for *completed* action are not formed from the same root as those for action *not completed*, but from another called the *second root*. This is formed in various ways.
- 192. In the first, second, and fourth conjugations, the second root is formed by adding $\bar{a}v$, \check{u} ,* and $\bar{v}v$, respectively, to the root † of the verb; e.g.:

^{*} A very few verbs of the second conjugation add ev, which may be regarded as the full form for which u is a contraction (the e being dropped, and v changed to u).

[†] This we will now call the 1st root, to distinguish it from the 2d.

			First Root.	Second Root
Conj.	I.	Amārĕ,	ăm,	ămāv.
Conj.	II.	Mŏnērĕ,	mŏn,	mŏnŭ.
Conj.	IV.	Audīrē,	aud,	$\operatorname{aud} \overline{\imath} v$.

193. In verbs of all the conjugations, the third persons singular of the tenses for completed action are formed by adding to the second root the following endings:

Perfect.	Pluperfect.	Future Perfect.
ĭt,	ĕrăt,	ĕrĭt.

PARADIGMS.

Pluperf. Amāv-ĕrăt, " " had loved.

Fut. Perf. Amāv-ĕrit, " " will have loved.

^{*} The perfect in Latin corresponds sometimes to our perfect indefinite, and sometimes to our perfect definite (perfect with have); hence, ămāvīt may be translated either he has loved, or he loved.

inserting n before t in the ending of the third person singular (35), except in the perfect, where it must be changed into $\bar{c}runt$; e. g.,

Perfect. Pluperfect. Fut. Perfect

Plur. Amāv-ērunt, ămāv-ĕrant, ămāv-ĕrint.

- 197. Most verbs of the third conjugation may be divided into two classes, viz.:
 - 1) Those which have the second root the same as the first.
 - 2) Those which form it by the addition of s.
- 198. The *first class* comprises most verbs of this conjugation which have the first root in a vowel, together with a few which have it in a consonant; e. g.,

Suĕrĕ, to sew: 1st root, sŭ; 2d root, sŭ. Dēfendĕrĕ, to defend: "dēfend; "dēfend.

199. The manner in which the third persons of the tenses for completed action are formed from the second root, has already been explained. See 193, 194.

PARADIGM.

THIRD CONJUGATION.

Dēfenděrě, to defend: 1st root, dēfend; 2d root, dēfend.

The king was walking through the city.

Rem.—In this example, per, through, is a preposition.

201. Partial Rule of Syntax.—Some prepositions govern the accusative, and some the ablative.

Rem. 1.—Whenever a preposition occurs in the exercises, its particular case will be given in the vocabularies.

Rem. 2.—The accusative, urběm, in the above example, is governed by the preposition per.

LESSON XXXVII.

Third Conjugation.—Class II.—Second Root formed by adding s to the First.

Carpěrě, to pluck; 1st root, carp; 2d root, carps. Rēpěrě, to creep; "rēp; "reps.

Rem.—When b stands at the end of the first root, it is changed into p before s in the second; e. g.,

Scrīběrě, to write; scrīb; scrips (not scribs). Nūběrě, to marry; nūb; nups (not nubs).

205. An adjective modifying the subject is sometimes used in Latin instead of an adverb modifying the verb; e. g.,

LESSON XXXVIII.

Third Conjugation.—Class II., continued.—Second Root formed by adding s to the First.

208. When a k-sound (c, g, h, qu) stands at the end of the first root, it generally unites, in the second, with the s which is added, and forms x (i. e. cs, gs, hs, or qus becomes x); e. g.,

^{*} What is the subject of est? (608, 2.)

Cingere, to surround; cing, cinx (cings).
Tegere, to cover; teg, tex (tegs).
Trahere, to draw; trah, trax (trahs).
Coquere, to cook; coqu, cox (coqus).

a) In a very few verbs gu and v must be treated as k-sounds in the formation of the second root; e. g.,

Exstinguërë, to extinguish; exstingu, extinx. Vīvěrě, to live; vīv, vix.

- b) Fluërë, to flow, and struërë, to build, together with their compounds, have the second root in x, as if the first ended in a k-sound, as probably it did originally.
- c) The k-sound is sometimes dropped before s in the second root; e. g.,

Spargěrě, to scatter; sparg, spars. Mergěrě, to merge; merg, mers. Parcěrě, to spare; parc, pars.

209. Vocabulary.

LESSON XXXIX.

Third Conjugation.—Class II., continued.—Second Root formed by adding s to the First.

211. WHENEVER a t-sound (d or t) stands at the end of the first root, it is generally dropped before s in the second, and the preceding vowel, if short, is lengthened; e. g.,

Clauděrě, to shut; claud, claus (clauds). Amittěrě, to lose; āmitt, amīs (amitts). Dīvĭděrě, to divide; dīvĭd, dīvīs (divids).

212. When a limiting noun denotes some *characteristic* or *quality* of the noun which it limits, it is always accompanied by an adjective, and is put either in the *genitive* or *ablative*; e. g.,

Puĕr eximiae pulchritūdinis. Puĕr eximiā pulchritūdinē. A boy of remarkable beauty.

213. Combining the above with the rule already given (65), we have the following

RULE OF SYNTAX.—A noun limiting the meaning of another noun is put,

- 1) In the same case as that noun, when it denotes the same person or thing; as, Lătīnus rex, Latinus the king.
- 2) In the genitive, when it denotes a different person or thing; as, Rēgis fīlius, the king's son: except
- (a) When it denotes character or quality; it is then accompanied by an adjective, and is put either in the genitive or ablative; as, Puer eximiae pulchritudinis;

or, Puer eximia pulchritudine, a boy of remarkable beauty.

214. RULE OF SYNTAX.—Verbs of accusing, sonvicting, acquitting, warning, and the like, take the accusative of the person and the genitive of the crime, charge, &c.; e. g.,

Caium proditionis accusant. (Caius of treachery they accuse.) They accuse Caius of treachery.**

REM.—Here proditionis is in the genitive, by the above rule.

to accuse.

215. (Eng. Id.) To condemn to death.

(Lat. Id.) To condemn of the head (căpĭtĭs).†

216. Vocabulary.

Accūsārě, av,

Ambitus, ūs, bribery. Amittere, amīs, to lose. of the head, to death Căpitis (gen.), (capital). Clauděrě, claus, to shut (close). to condemn. Damnārě, āv, Făcies, ēī, face, appearance. Furtum, ī, theft (furtive). talent, ability Ingenium, ī, (ingenious). Lūděrě, lūs, to play. Nunquăm, never. Proditio, onis, treachery. Saltārĕ, āv, to dance. Vir,t virī, man, he:o.

^{*} This genitive is not properly governed by the verb, but by a noun understood; thus, if we supply erīmīnē with prēdītiēnīs in the example, the sense will not be changed; as, 'They accuse Caius with the charge of treachery.'

[†] We may suppose that it was originally, "to condemn to the loss of the head," or, "to the punishment of the head."

[‡] Homo, G. hominis, and vir are both man: but homo is man as opposed to other animals; that is, a human being. whereas vir is man

as opposed to woman.—When men means human beings, men generally (including both sexes), it should be translated by homines.—When man is used contemptuously, it should also be translated by homo, because that word says nothing better of a person than that he is a human being.—When man is used respectfully, with any praise, &c., it should be translated by vir.

LESSON XL.

Formation of the Second Root.—First Irregularity— Radical vowel lengthened (and often changed).

218. REGULAR Endings of the Second Root of Verbs.

--	-------------------

Rem.—The above table presents only the regular endings of the second root; there are, however, several irregularities in the formation of that root which we must notice.

They have surrounded the city with walls. 19. They have offended-against the laws of their country.

LESSON XLII.

Formation of the Second Root.—Third Irregularity—Second root after the analogy of other conjugations.

225. A FEW verbs in each conjugation form the second root according to the analogy of one or more of the other conjugations.

1) A few in the first conjugation follow the analogy of the second; e. g.,

Mĭcārĕ, to glitter: 1st root, mĭc; 2d root, mĭcŭ.

2) A few in the second follow the analogy of the third; e.g.,

Rīdērě, to laugh; 1st root, rīd; 2d root, rīs (rids). Lūgērě, to mourn; "lūg; "lux (lugs).

3) A few in the third follow the analogy of the second or fourth; e. g.,

Cŏlĕrĕ, to till; 1st root, cŏl; 2d root, cŏlŭ. Pĕtĕrĕ, to seek; "pĕt; "pĕtīv. 4) A few in the fourth follow the analogy of the second or third; e. g.,

· Apěrīrě, to open; 1st root, ăpěr; 2d root, ăpěrů. Vincīrě, to bind; "vinc; "vinx (cs).

Rem.—Verbs of the third conj. which have the 1st root in sc, together with a few others, generally change the consonant-ending of the 1st root into v in the 2d; as, crescere, to increase; 1st root, cresc; 2d, crev. Most of these verbs are supposed to have been derived from pure roots.

226. Rule of Syntax.—Length of time is generally expressed by the accusative; e. g.,

Caius annum unum vixit. (Caius year one lived.)
Caius lived one year.

- 227. RULE OF SYNTAX.—The name of a town (91) where any thing is or is done, if of the first or second declension, and singular number, is put in the genitive; otherwise, in the ablative; e. g.,
 - Caiŭs annum unum Cortonae vixit. Caius lived one year at Cortona.
 - Caiŭs annŭm ūnŭm Tībŭrĕ vixĭt.
 Caius lived one year at Tibur.

REM.—In these examples, Cortonae and Tībūre are names of towns, the first is put in the genitive, because it is of the first declension, and sing. number, and the second in the ablative, because it is of the third declension.

228. VOCABULARY.

LESSON XLIII.

Subjunctive Mood.

230. THE Subjunctive Mood represents the action or state expressed by the verb, not as a fact, but simply as a possibility, wish, or conception of the mind; e. g.,

1. Serībăt, \begin{cases} \text{he may write,} \\ \text{may he write,} \\ \text{let him write.} \end{cases}

2. Vēnīt ŭt scrībăt, { he has come that he may write, he has come to write.

Rem.—Scrībăt in the above examples is in the present subjunctive.

231. The present subjunctive, when not preceded by $\check{u}t$, generally expresses either a wish (to be translated by may he), or a command (to be translated by let him, &c.).

232. If the wish or command is to be expressed negatively, $n\bar{e}$ (never $n\bar{o}n$) must be used with the subjunctive; e. g.,

Nē pǔtět, let him not think.

233. The tenses of the subjunctive mood* are the present, imperfect, perfect, and pluperfect.

234. The endings of the third persons sing. of the tenses of the subjunctive are as follows:

		Present.	Imperfect.	Perfect.	Pluperfect
		(1st root.)	(1st root.)	(2d root.)	(2d root.)
Conj.	I.	ĕt,	ārĕt,	ĕrĭt,	issĕt.
Conj.	II.	ĕăt,	ērět,	ĕrĭt,	issĕt.
Conj.	III.	ăt,	ĕrĕt,	ĕrĭt,	issĕt.
Conj	IV.	ĭăt,	īrĕt,	ĕrĭt,	issĕt.

^{*} The subjunctive has no futures.

Rem.—The third persons plural of the several tenses of the subjunctive are formed by inserting n before t in the ending of the third singular.

235. The English signs corresponding to the Latin subjunctive are as follows:

Present, may or can.

Imperfect, might, could, would, or should.

Perfect, may have.

Pluperfect, might, could, would, or should have.

LESSON XLIV.

Subjunctive Mood.—Purpose.

238. The present and imperfect subjunctive in Latin

are often used to express a purpose.

239. The infinitive often denotes purpose in English, but never in Latin; accordingly, in expressions of purpose, the idioms of the two languages are entirely distinct from each other, and should be carefully studied.

- 240. Eng. Id. $\{I \text{ have come to see you.} \}$
 - Lat. Id. $\begin{cases} I \text{ have come that } I \text{ may see you.} \\ I \text{ came that } I \text{ might see you.} \end{cases}$
- 241. When a purpose is to be expressed affirmatively, $\check{u}t$ is used with the subj., when negatively, $n\bar{e}$; e. g.,
 - Balbum rogat ut puerum doceat.
 (Balbus he asks that the boy he may teach.)
 He asks Balbus to teach the boy.
 - Balbum rögat nē puerum doceat.
 He asks Balbus not to teach the boy.
- 242. The subjunctive expressing purpose must be in the present tense; unless the verb on which it depends is in a past tense (imperfect, perfect indefinite, or pluper fect), and then it must be in the imperfect.
 - Rem.—The perfect definite (193, Rem.), or perfect with have (which denotes that the action has been done in a period of time still present), is considered a present tense, and followed by the present subjunctive.

243. EXAMPLES.

- 1. Věnit ŭt portās claudăt.

 (He is coming that the gates he may shut.)

 He is coming to shut the gates.
- Vēnĭt (indef.) ŭt portās claudĕrĕt.
 (He came that the gates he might shut.)
 He came to shut the gates.
- 3. Vēnit (def.) ŭt portās claudāt.
 (He has come that the gates he may shut.)
 He has come to shut the gates.

Rem. 1.—In the 1st example the subjunctive is in the present tense, because the verb vent, on which it depends, is present; while in the 2d, it is in the imperfect, because its verb, vent (came), is in the perfect indefinite.

Rem. 2.—In the 3d example the subjunctive is m the present, because the verb venit (has come) is in the perfect definite, and, though in form the same as in the 2d example, really expresses different time.

REM. 3.—The Latin perfect, when followed by the present subjunctive, must be translated into English with the sign have, as in example 3.

244. Vocabulary.

Compărare, av, to procure, to raise, to levy.

Discere, didic, to learn.

Eděre, ēd, to eat (edible).

Evertere, evert, to overthrow, to pull down.

Plūrimus, a, um, very much or great, pl., very many.

Quiescere, quiev, to rest, be quiet (quiescent).

Rogare, av, to ask, to entreat.

Vīvere, vix, to live (vivid).

245. Exercises.

(Construe ŭt and the subjunctive by the infinitive.)

LESSON XLV.

Persons of Verbs.—Indicative Mood.—First Conjugation.

246. It will be remembered that verbs have three persons (12): these are distinguished from each other by certain terminations called *Personal Endings*.

247. The three persons may be formed in the perfect indicative (which is somewhat irregular) by changing *it*, of the third person singular, into the following

PERSONAL ENDINGS.

	Singular.			Plura	l.
1st Pers.	2d Pers.	3d Pers.	lst Pers.	2d Pers.	3d Pers.
ī,	istī,	ĭt.	ĭmŭs,	istis,	ērunt (or ērē).

248. In all the tenses* of the indicative and subjunctive moods, except the perfect indicative, the three persons may be formed by changing t of the third singular into the following

PERSONAL ENDINGS.

	Singular.	i e		Plural.	
1st Pers.	2d Pers.	3d Pers.	1st Pers.	2d Pers.	3d Pers.
m, ŏ,	8,	t.	mŭs,	tĭs,	nt.

a) The ending o, for the first person singular, belongs to the *indicative present*, future perfect, and, in the first and second conjugations, to the future. The vowel which stands before t in the third person is dropped before o in the first person, except in the present of the second and fourth conjugations (and in a few verbs of the third); e. g.,

3d Person.

1st Person.

Pres	. 1st	Conj.	Amăt, he loves,	ămŏ (ă dropped), I love.
"	2d	66	Monet, he advises,	moneo (e not dropped), I advise.
ĸ	3d	"	Rěgit, he rules,	rĕgŏ (i dropped), I rule.
"	4th	66	Audit, he hears.	audio (i not dropped), I hear,

b) The ending m, for the first person singular, belongs to the indicative imperfect, pluperfect, and, in the third and fourth conjugations, to the future, and to the subjunctive throughout all its tenses. In the future of the third and fourth conjugations, the vowel \check{e} , which stands before t in the third person, is changed into \check{a} before m in the first person; e. g.,

3d Person.

1st Person.

Imperf.	Amābăt, he was loving,	ămābăm, I was loving.
Pluperf.	Amāvěrăt, he had loved,	ămāvěrăm, I had loved.
Fut. 3d Conj.	Rěgět, he will rule,	rěgăm, I will rule.
" 4th "	Audiet, he will hear,	audiăm, I will hear.

^{*} We of course speak only of the active voice, as the passive has not yet been noticed.

c) In the present and future tenses of the indicative, if i stands before t in the third singular, it is changed into iu in the third plural, in the fourth conjugation, and into u in the other conjugations; e.g.,

Singular.

Plural.

Fut. 1st Conj. Amābit, he will love, amābunt, they will love.

Monebit, he will advise, monebunt, they will advise.

Pres. 3d "

Regit, he rules, regunt, they rule.

" 4th " Audit, he hears, audiunt, they hear.

249. The vowel before the personal endings mus and tis, is long in the imperfect and pluperfect of the indicative, and in all the tenses of the subjunctive, except the perfect, in which it is common* (long or short).

PRONOUNS.

- 254. Pronouns are words which supply the place of nouns; as, $\tilde{e}g\tilde{o}$, $\tilde{1}$; $t\tilde{u}$, thou, &c.
 - 255. Pronouns are divided into two classes; viz.,
 - 1) Substantive Pronouns; as, čgŏ, tū, &c.
 - 2) Adjective Pronouns; as, hīc, this; illě, that.
- 256. Substantive Pronouns are three in number, viz.: ĕgŏ, I (which is of course of the first person); tā, thou (second person); and suō, of himself (third person). These from their signification are often called Personal Pronouns.
 - 257. Substantive Pronouns are declined as follows:

	SINGULAR.	
1st Person.	2d Person.	3d Person.

PARADIGM-continued.

PLUPERFECT (2d root), might, could, would, or should have.							
Conj. I.	Conj. II.	Conj. III.	Conj. IV.				
Amāv-issēm, Amāv-issēs, Amāv-issēt; Amāv-issēmus, Amāv-issētis, Amāv-issent.	Mŏnu-issēm, Mŏnu-issēs, Mŏnu-issēt; Mŏnu-issēmūs, Mŏnu-issent.	Rex-issēm, Rex-issēs, Rex-issēt; Rex-issēmus, Rex-issētis, Rex-issent.	Audīv-issēm, Audīv-issēs, Audīv-issēt; Audīv-issēmus, Audīv-issētīs, Audīv-issent.				

Rem.—It will be observed that throughout the subjunctive the 1st person sing. ends in m.

262. The subjunctive with $\check{u}t$ is used to express a result; e. g.,

Tantum est frīgus ut nix non liquescat. The cold is so great that the snow does not melt.

263. The subjunctive with $\check{u}t$, denoting result, generally depends upon a proposition which contains some word signifying so, such, so great, &c.; thus, in the above example, it depends upon tant $\check{u}m$ (so great, or such).

264. Hence, in turning English into Latin, that after so, such, so great, &c., must be translated by ŭt, and the verb which follows must be put in the subjunctive. (See example above.)

265. When the subjunctive depends upon a verb in the present, perfect definite, or future, it must be put in the present tense, unless it represents its action as completed at the time denoted by the principal verb; and then it must be in the perfect; e. g.,

Tantă est puĕrī industriă ŭt multă discăt.
 The boy's industry is so great that he learns much.

2. Nesció quid dixerit.

I do not know what he has said.

Rem.—In the first example, the subjunctive discat (icarns) is in the present tense, because the time of its action is the same as that of est (pres.) on which it depends, and in the second example dixert (he has said) is in the perfect, because it represents its action as completed at the time denoted by nescio (i. e. pres.).

266. When the subjunctive depends upon a verb in the *imperfect*, perfect indefinite, or pluperfect, it must be put in the imperfect tense, unless it represents its action as completed at the time denoted by the principal verb, and then it must be in the pluperfect, e. g.,

- Tantă ĕrăt puĕrī industriă ŭt multă discĕrĕt.
 The boy's industry was so great that he learned much.
- 2. Nescīvī quĭd dixissĕt.

 I did not know what he had said.

Rem.—The imperf. disceret represents its action as not completed, while the pluperfect dixisset represents its action as completed.

266. A few adjectives in Latin are often used merely to specify some particular part of the nouns to which they belong; e. g.,

In summo on the highest mountain (Lat. Id.).

montě, on the top of the mountain (Eng. Id.).

In mědiīs on the top of the mountain (Eng. Id.).

ăquīs, on the highest mountain (Lat. Id.).

in the middle waters (Lat. Id.).

in the middle (or midst) of the waters

(Eng. Id.).

7. Let him keep his word. 8. Do not break your word. 9. Do not sell your country for gold. 10. On the top of the mountain the snow never melts. 11. On the top of the Alps the snow never melts. 12. The fish is swimming in the middle of the water.

LESSON XLVIII.

Indicative and Subjunctive Moods, continued.—Verbs in io of the Third Conjugation.—Demonstrative Prenouns.

270. A few verbs of the third conjugation are inflected (i. e. form their tenses, numbers, and persons) in the present, imperfect, and future indicative, and in the present subjunctive, like verbs of the fourth conjugation. The following is an example.

Rem. In the present, first and second persons plural, the i in the penult is short; as, $c\check{a}p\check{\imath}m\check{u}s$, $c\check{a}p\check{\imath}t\check{\imath}s$.

- Rem.—The remaining parts of the indicative and subjunctive moods, in verbs in $i\delta$, are entirely regular.
- 272. It has been stated (255) that pronouns are divided into two classes, viz., Substantive Pronouns and Adjective Pronouns.
- 273. Adjective pronouns are so called, because they are sometimes used as pronouns to supply the place of nouns, and sometimes as adjectives to qualify nouns. These are divided into several classes.
- 274. Demonstrative Pronouns, so called because they point out or specify the objects to which they refer, are hīc, illĕ, istĕ, ĭs, and their compounds, and are declined as follows:

LESSON XLIX.

Indicative and Subjunctive Moods, continued.—Intensive Pronoun.

277. THE Intensive Pronoun, ipse, himself, is so called because it is used to render an object emphatic;

it is also called an *adjunctive* pronoun, because it is usually joined to a noun, or to some other pronoun; as, $R\bar{o}m\bar{u}l\bar{u}s$ $ips\bar{e}$, Romulus himself; $t\bar{u}$ $ips\bar{e}$, you yourself.

278. *Ipse*, when joined to a noun or pronoun, may sometimes be translated by *very*; as, hōc *ipsum*, this *very* thing.

279. Ipsě is declined as follows:

S	ingular.			Plural.	
M. N. Ipsě,	F. ipsă,	N. ipsŭm.	M. Ipsī,	F. ipsae,	N. ipsă.
G. Ipsīŭs, D. Ipsī,	ipsīŭs, ipsī,	ipsīŭs. ipsī.	Ipsērum, Ipsīs,	ipsārŭm, ipsīs,	ipsērum. ipsīs.
A. Ipsŭm, V.	ipsăm,	ipsŭm.	Ipsős,	ipsās,	ipsă.
A. Ipsō,	ipsā,	ipsō.	Ipsīs,	ipsīs,	ipsīs.

Rem.—The substantive pronouns are rendered intensive by annexing the syllable mět; as, ĕgŏmět, I myself. In the substantive pronoun of the third person, sēsē is used intensively in the accusative and ablative of both numbers.

280. Vocabulary.

Accēděrě, access, to approach (access). At. but, yet. Fortūnă, ae, fortune. Fŭgă, ae, flight. Genus, generis, kind, nature. Justus, a, um, just, fair. Numerus, i, number (numerous). Occultare, av. to conceal (occult). Respondērě, respond, to answer (respond) as far as; usque ad, even to. Usquě,

LESSON L.

Indicative and Subjunctive Moods, continued.—Relative and Interrogative Pronouns.

282. The Relative Pronoun, $qu\bar{\imath}$, who, is so called, because it always relates to some noun or pronoun, expressed or understood, called its antecedent. It is declined as follows:

Si	ngula r.			Plural.	
M.	F.	N.	M.	F.	N
N. Quī,	quae,	quŏd.	Quī,	quae,	quae.
G. Cujŭs,	cujŭs,	cujŭs.	Quōrŭm,	quārŭm,	quōrŭm.
D. Cuī,	cuī,	cuī.	Quĭbŭs,	quĭbŭs,	quĭbŭs.
A. Quĕm,	quăm,	quŏd.	Quōs,	quās,	quae.
v.	7	•			
A. Quō,	quā,	quō.	Quibus,	quĭbŭs,	quĭbŭs.

283. Rule of Syntax.—The relative agrees with its antecedent in *gender* and *number*; as, Puĕr quī scrībĭt, the boy who writes.

REM.—Qui is in the masculine singular, to agree with its antecedent puer; but it is in the nominative because it is the subject of scribit, and not because its antecedent is in the nominative.

284. The Interrogative Pronouns, quis and qui, are so called because they are used in asking questions. Qui (which? what?) is used adjectively, and is declined like the relative. Quis (who? which? what?) is generally used substantively, and is declined like the relative, except the forms quis, quid, as follows:

	Sin	ngula r.		1	Plural.	
	M.	\boldsymbol{F}	N.	M.	F.	N.
N.	Quis,	quae,	quĭd.	Quī,	quae,	quae.
G.	Cujŭs,	cujŭs,	cujŭs.	Quorum,	quārŭm,	quōrŭm.
D.	Cuī,	cuī,	cuī.	Quĭbŭs,	quĭbŭs,	quĭbŭs.
A.	Quěm,	quăm,	quĭd.	Quós,	quās,	quae.
V.						-
A.	Quō,	quā,	quō.	Quĭbŭs,	quĭbŭs,	guĭbŭs.

LESSON LI.

Indicative and Subjunctive Moods, continued.—Interrogative Particles.

287. Ne and num are interrogative particles; and when a question has no interrogative pronoun (284) or interrogative adverb, one of these particles must be used.

288. If $n\check{e}$ is used, it must follow and be joined to some other word; and, if there is a not in the sentence, it must be joined to the $n\bar{o}n$ (not), making nonn \check{e} ; e. g.,

1. Scrībitne Caiŭs? Is Caius writing?

2. Nonně scrībit? Is not he writing?

3. Num scrībit Caius? Is Caius writing? [No.]

Rem.—A question with ně and without non asks for information (Ex. 1), with non expects the answer yes (Ex. 2), and with num expects the answer no (Ex. 3); thus, Num scribit Caius, means, Caius is not writing, is he?

289. Vocabulary.*

Aspergěrě, aspers, sprinkle.

(a) 1. Scripsitne Caius?† 2. Num scripserātis? 3. Num rex portas urbis sua manu claudet? 4. Quid rides?

^{*} It has been thought unnecessary longer to insert key-words in the Vocabularies, but it is hoped the pupil will still continue to accustom himself to associate with his Latin at least some of the more common English words which have been derived from it.

[†] In construing a question, the auxiliary verb (does, do, did, has, have) must be put before the subject; as, Scripsitne puer, Has the boy written? or, Did the boy write?

- 5. Caius se in flumen immersit. 6. Periculōsum est hiĕme se in flumen immergēre. 7. Puer se in flumen immergat. 8. Agricolārum est semīna auctumno spargēre. 9. LESSON LII.

Indicative and Subjunctive Moods, continued.—Pronouns, Indefinite and Possessive.

291. Indefinite Pronouns are so called because they do not definitely specify the objects to which they refer; e. g., quīdăm, a certain one; ălĭquĭs, some one; quisquĕ, every one; sīquĭs, if any, &c.

292. The *indefinite pronouns* are compounds either of quis or qui, and are declined in nearly the same manner as the simple pronouns.

293. $Qu\bar{\imath}d\bar{a}m$, compounded of $qu\bar{\imath}$ and $d\bar{a}m$, is declined like $qu\bar{\imath}$, except in the neuter singular, where it

takes $qu\bar{u}d$ (instead of $qu\bar{u}d$) when used substantively and in the accusative singular and genitive plural, where m before d is changed into n; as, $quend\bar{u}m$ (not $quend\bar{u}m$), $qu\bar{v}rund\bar{u}m$ (not $qu\bar{v}rund\bar{u}m$).

294. Alĭquĭs, compounded of ăliŭs and quĭs, is declined like quĭs, except in the neuter singular, nominative and accusative, where it has ălĭquŏd adjective, and ălĭquĭd substantive; and in the feminine singular and neuter plural, where it has ălĭquă. It is declined as follows:

		SINGULAR.

N.	Aliquis,	ălĭquă,	ălĭquŏd or ă!ĭquĭd
G.	Alĭcujŭs,	ălicujŭs,	ălicujus.

^{*} The remaining forms are given here in order to complete the Paradigm of the verb esse, although the nature and use of the imperative and infinitive moods, and of the participles, have not yet been examined; a word of explanation will be sufficient for this place.

- 300. The *Imperative Mood* denotes a command, and of course is never used in the first person.
- 301. The *Infinitive Mood*, as we have already seen (9), represents simply the meaning of the verb, without person or number. It has three tenses, *present*, *perfect*, and *future*.
- 302. The *Participle* is that part of the verb which has the form and inflection of an adjective; thus, the participle $f \check{u} t \bar{u} r \check{u} s$, \check{u} , $\check{u} m$, is declined like the adjective $b \check{o} n \check{u} s$, \check{u} , $\check{u} m$ (112).

LESSON LIV.

Verb Esse, continued.—Comparison of Adjectives.

305. Adjectives in Latin, as in English, may express different degrees of the quality which they denote; e.g.,

Altŭs, altiŏr, altissĭmŭs. High, higher, highest.

Rem.—In this example, altus (high) is said to be in the positive degree; altior, in the comparative; and altissimus, in the superlative.

306. In Latin, adjectives are compared by adding to the root of the positive the following endings:

Comparative. Superlative.

M. F. N. M. F. N.
iŏr, iŏr, iŭs. issĭmŭs, issĭmă, issĭmŭm.

Examples. Root. Comparative. Superlative.

Altūs (high), alt. altiŏr (iŏr, iŭs), altissĭmūs (ă, ŭm).

Mītīs (mild), mīt. mītiŏr (iŏr, iūs), mītissīmūs (ă, ŭm).

Rem. 1.—Adjectives in er add rimus (a, um) to the positive, to form the superlative; e. g.,

Pulcher, pulchriör, pulcherrin üs.

REM. 2.—A few adjectives in No form the superlative by adding Nmus to the root of the positive; e.g.,

Făcilis (easy),	făcilior,	fācillimŭs.
Difficilis (difficult),	diffĭcĭliŏr,	diffīcillīmŭs.
Sĭmĭlĭs (like),	sĭmĭliŏr,	sĭmillĭmŭs.
Dissimilis (unlike),	dissĭmĭliŏr,	dissimillimus.

Rem. 3.—The following adjectives are quite irregular in their comparison, viz.:

Bŏnŭs (good),	měliŏr,	optimus.
Mălŭs (bad),	pejŏr,	pessĭmŭs.
Māgnus (great),	majŏr,	maximus.
Parvus (little),	mĭnŏr,	minimüs.
Multus (much),	plūs (pl. plūrēs, plūră),	l plūrīmus.

- 307. The conjunction quăm is generally used with the comparative degree, unless one of the persons or things compared is the subject of the proposition, in which case quăm is usually omitted, though sometimes used; e. g.,
 - Nihĭl est clēmentiā dīvīniŭs.
 Nothing is more godlike than clemency.
 - Europă minor est quam Asia.
 Europe is smaller than Asia.
- · 308. Rule of Syntax.—The comparative degree without quăm is followed by the ablative.
 - REM. 1.—Clementia in the first example is in the ablative by this rule.
 - Rem. 2.—If $qu\check{a}m$ is expressed, the following noun will be in the same case as that which precedes: thus, $Asi\check{a}$, which follows $qu\check{a}m$ in the second example, is in the same case as $Eur\~op\~a$, which precedes.
- 309. The conjunction quăm before a superlative renders it intensive; e. g.,

Quăm plūrimi,
$$\begin{cases} Eng. \ Id. \ \text{As many as possible.} \\ Lat. \ Id. \ \text{As the most.} \end{cases}$$
Quăm maximus, $\begin{cases} Eng. \ Id. \ \text{As great as possible.} \\ \text{The greatest possible.} \end{cases}$
Lat. $Id. \ \text{As the greatest.} \end{cases}$

Rem.—The superlative may often be best translated by very irstead of most; as, mons altissimus, a very high mountain.

310. VOCABULARY.

Amplūs, ă, ŭm, extensive, great.
Argentūm, ī, silver.

as possible.

LESSON LV.

Compounds of Essĕ.—Comparison of Adverbs.—Numeral Adjectives.

312. The compounds of esse (except posse, to be able, which is irregular, and will be noticed hereafter) are conjugated like the simple esse. $pr\bar{o}dess\bar{e}$, however (compounded of $pr\bar{o}$, for, and esse, to be), inserts d after $pr\bar{o}$ in those parts which in the simple verb begin with e; as,

Pres. Prosum, prodest, prodest, prosumus, prodestis,

prosunt, &c.

313. The compounds of esse (except posse) are followed by the dative, as they take only an indirect object (82 and 643, 2); e. g.,

Mihī profuĭt.

It profited me (did good to me).

Rem.—Here it is plain that mili (to me) is not a direct, but only an indirect object.

314. Most adverbs are derived from adjectives, and are dependent upon them for their comparison: the comparative of the adverb being the same as the neuter comparative of the adjective, and the superlative being formed from that of the adjective by changing the ending $\tilde{u}s$ into \bar{e} ; as,

Adj. Altŭs, altiŏr (iŭs neut.), altissĭmŭs. Adv. Altē, altiŭs, altissĭmē.

NUMERALS.

315. Numerals comprise,

(a) Numeral adjectives, consisting of three distinct classes; viz.,

- 1) Cardinals, which denote simply the number of objects; as, ūnŭs, one; duŏ, two, &c.
- 2) Ordinals, which denote the position of any object in a series; as, prīmus, first; secundus, second.
- Distributives, which denote the number of objects which are taken at a time; as, singula, one by one; bīnī, two by two.

(b) Numeral adverbs; as, semel, once; bis, twice. (See Numerals, 583.)

- 316. RULE OF SYNTAX.—Adverbs modify verbs, adjectives, and other adverbs; e. g., Mīlěs fortiter pūgnăt, the soldier fights bravely. Haud difficilis, not difficult.
- 317. (a) The first three cardinals, $\bar{u}n\bar{u}s$, $du\bar{o}$, and $tr\bar{e}s$, are declined as follows:

1. Paradigm of ūnus, one.

N. Unŭs, G. Unīŭs, D. Unī, A. Unŭm, V. Unĕ,	ūnă, ūnīŭs, ūnī, ūnăm, ūnă,	ūnŭm. ūnīŭs. ūnī. ūnŭm. ūnŭm.	Unī, Unōrŭm, Unīs, Unōs,	ūnae, ūnārŭm, ūnīs, ūnās,	ŭnă. ūnōrŭm. ūnīs. ūnă.
A. Uno,	ūnā,	ūnō.	Unīs,	ūnīs,	ūnīs.

Rem.—The plural of ūnūs, as a numeral, is used only with nouns which have no singular.

2. Paradigms of duŏ, two, and trēs, three.

N. I G. I)uŏ,)uōrŭm,	duae, duārŭm,	duŏ. duōrŭm. duōbŭs.	Trēs (m. & f.), Triŭm,	triă. triŭm. tribŭs.
	Juobus, Juos <i>and</i> duŏ,		duŏ.	Trēs,	triă.
V. I A. I	Ouŏ, Ouŏbŭs,	duae, duābŭs,	duŏ. duōbŭs.	Trēs, Trībŭs,	triă. trĭbŭs.

Rem.—Tres is declined like the plural of tristis (153).

- (b) Cardinal numbers, from four to one hundred, are indeclinable; those denoting hundreds are declined like the plural of bŏnŭs (112); e. g., dŭcentī, ae, ă, two hundred.
- 318. Ordinals are declined like bonus. Distributives are declined like the plural of bonus.
- 319. Whenever the same noun belongs to both members of a comparison in Latin, it is generally expressed in the first and omitted in the second; in English, however, it is expressed in the first, and represented in the second by the pronoun that or those; e. g.,

Măris superficies major est quam terrae.

The sea's surface is greater than $(that^*)$ of the land.

Rem.—Hence, in translating English into Latin, that, those, after than, should be omitted.

320. Vocabulary.

Concertare, av, to contend, quarrel. Continuus, a, um, successive. Decem, ten.

Decem, ten.

Děcimus, ă, um, tenth.

Duŏ, duae, duŏ, two.

^{*} Here that stands for the surface.

imas copias comparavěrat. 6. Caius, vir summo ingenio praeditus, Romae habitat. 7. Servus meus proelio interfuit. 8. Fides plurimis profuit. 9. Christianorum est avaritiam damnare. 10. Caius multis proeliis interfuerat. 11. Terrae superficies minor est quam maris. 12. Caesar decimam legionem misit.

(b) 1. They will fight bravely. 2. You fought more bravely than the Romans. 3. The king himself was engaged in the battle. 4. He fought very bravely. 5. It is the part of a Christian to do good to as many as possible. 9. Caesar raised the greatest forces possible. 10. Many states relying on their strength will raise forces.

LESSON LVI.

Passive Voice.—Third Persons of Tenses for continued
Action.

- 322. A TRANSITIVE verb (72) may represent its subject,
 - 1) As acting upon some object; as, Păter fīlium docet, the father teaches his son; it is then said to be in the Active Voice.
 - 2) As acted upon by some other person or thing; as, Fīliŭs ā pătrĕ dŏcētŭr, the son is taught by his father; it is then said to be in the Passive Voice.

- Rem.—The forms which have been used in the previous exercises all belong to the active voice: we shall now consider the formation and use of the passive.
- 323. The third persons (singular and plural) of the tenses for continued action (190), both in the indicative and subjunctive moods, are formed in the passive voice, by adding the ending $\check{u}r$ to the corresponding forms of the active.
- a) But observe that the vowel before the t in the singular is long, except from it in the third conjugation, and from abit and $\bar{\epsilon}bit$.
- 324. The following table presents the formation of the third persons of the passive in the moods and tenses just mentioned.

325. Rule of Syntax.—Passive verbs are followed by the same cases as the active, except the direct object, which becomes the subject of the passive (322); e. g.,

Act. Illī Balbum furtī accūsant.
They accuse Balbus of theft.

Pass. Balbūs āb illīs furtī accūsātŭr.
Balbus is accused of theft by them.

Rem.—Observe that the agent is put in the ablative with \check{ab} (ab illis) a, however, is often used before a consonant.

LESSON LVII.

Passive Voice.—Third Persons of Tenses for Completed Action.

328. The tenses for completed action in the passive voice are called *Compound Forms*, and consist of the perfect participle with certain parts of the verb esse (299). We must accordingly notice here the formation of this participle.

329. The perfect participle is formed from what is called the *third root*, by the addition of the ending **u**s (**a**, **u**m), and is declined like bŏnus.

330. The third root is formed from the first,

1) In the first, second, and fourth conjugations by the addition of the respective endings, $\bar{a}t$, it, and $\bar{u}t$; e.g.,

Amārĕ,ăm,ăm $\bar{a}t$.Mŏnērĕ,mŏn,mŏnit.Audīrĕ,aud,aud $\bar{t}t$.

2) In the third conjugation, by the addition of t or sometimes s (especially to the t-sounds).

- a) Any p-sound before t is p (i. e., pt or bt becomes pt).
- b) Any k-sound before t is c (i. e., ct, gt, or qut becomes ct).
- c) D, and sometimes g, is dropped before s (see 208, c, and 211).
 Scriběrě, scrib, script (b changed to p).

Rěgěrě, rěg, rect (g changed to c).
Clauděrě, claud, claus (d dropped).

- 331. The third persons singular of the perfect, pluperfect, and future perfect of the passive indicative are formed respectively from the third singular of the present, imperfect, and future* of the indicative of the verb esse and the perfect participle; and the plural is formed in the same way, by using the plural of the participle and verb.
- 332. The third persons of the perfect and pluperfect passive subjunctive, are formed by a similar combination of the perfect passive participle with the third persons of the present and imperfect† subjunctive of esse.

LESSON LVIII.

Indicative Mood of the Passive Voice.

- 335. The persons of the tenses for continued action in the indicative and subjunctive moods may be formed from the corresponding parts of the active, as follows:
 - a) The first persons, by dropping the final consonant (when there is one), and adding r; e. g.,
 Amŏ (act.), ămŏr (pass. r added).
 Amābăm (act.), ămābăr (pass. m dropped, r added).
 - b) The second persons, by changing s (sing.) into ris (or re), and tis (plur.) into minī; e. g.,

Amās (act.), ămāris (or re) (pass. s changed to ris or re). Amātis (act.), ămāminī (pass. tis " " minī).

c) The third persons, by adding $\tilde{u}r$ (323); e.g.,

Amăt (act.), ămātŭr (pass. ŭr added). Amant (act.), ămantŭr (pass. ŭr added).

336. The personal endings of the tenses for continued action, in the indicative and subjunctive moods, active and passive, are as follows:

	A	Singular.	1		Plural.	
1	1.	2.	3.	1.	2.	3.
Act.	ŏ, m,	s,	t,	mŭs,	tĭs,	nt,
Pass.	r.	ris, rĕ.	tŭr.	mŭr.	minī.	ntur.

337. The first and second persons of the passive may accordingly be formed directly from the third (as already obtained), by changing its ending into those of the first and second, and observing the same principles for vowel changes as apply to the active (2±8); e. g.,

3d Pers.1st Pers.2d PersSing. Amātūr,ămŏr (vowel changed) ămārĭs (rĕ).Plur. Amantūr,ămāmŭr,ămāminī.

338. The first and second persons of the tenses for completed action may be obtained directly from the third person, by simply changing the third person of the proper tense of esse into the first and second; e. g.,

Sing. Amātūs est, amātūs sūm, amātūs est. Plur. Amātī sunt, amātī sūmūs, amātī estīs.

LESSON LX.

Imperative Mood -Active and Passive.

346. The *Imperative* mood expresses a command, an exhortation, or entreaty. It is used only in the present tense, and in the second and third persons.

347. If a negative accompanies the imperative, it must be expressed in Latin by $n\bar{e}$ (instead of $n\bar{o}n$); e.g.,

Nē peccātĕ, do not sin.

Rem.—It will be remembered that a command or exhortation may also be expressed by the present subjunctive (231).

348. The imperative is formed from the first root by the addition of the following endings:

353. The infinitive mood has in each voice three tenses; viz., the present, perfect, and future.

Rem.—We must here give the formation of the *supine* and *future act.*participle (both of which we shall soon notice), as they are used in forming the future infinitive.

354. The future active participle and the active supine are formed from the third root; the former by the addition of $\bar{u}r\check{u}s$ (\check{a} , $\check{u}m$); as, $\check{a}m\bar{a}t$ (3d root), $\check{a}m\bar{a}t\bar{u}r\check{u}s$ (\check{a} , $\check{u}m$); and the latter by the addition of $\check{u}m$; as, $\check{a}m\bar{a}t$, $\check{u}m\bar{a}t\check{u}m$.

355. The infinitives are formed as follows:

1) The present, from the first root by the addition of the endings:

	Conj. I.	Conj. II.	Conj. III.	Conj. IV.
Act.	ārĕ,	ērĕ,	ĕrĕ,	īrĕ.
Pass.	ārī,	ērī,	ī,	īrī.

2) The perfect active, from the second root by

the addition of the ending isse; and the perfect passive from the perfect participle and esse.

- 3) The future active, from the future active participle and esse; and the future passive from the supine and $\bar{\imath}r\bar{\imath}$.
- 356. Paradigm of the Infinitive Mood.

357. RULE OF SYNTAX.—The subject of an infinitive must be put in the accusative; e. g.,

Vĭdĕt tē essĕ beātŭm. He sees that you are happy.

- REM. 1.—The accusative te is the subject of esse.
- Rem. 2.—The use of the infinitive, as the subject of a finite verb, has been already considered (184).
- 358. RULE OF SYNTAX.—The infinitive, either alone or with other words connected with it, may depend upon another verb; e. g.,
 - Cŭpĭt săpĕrĕ.
 He desires to be wise.
 - 2. Spērăt sē victūrum esse. He hopes that he shall live.
 - Rem. 1.—In most cases the infinitive is really the direct object of the verb on which it depends; thus săpĕrĕ (to be wise) is really the object desired. He desires (what?) to be wise.
 - Rem. 2.—In the compound infinitives (i. e., those which are made up of two words) the participles must agree in gender, number, and case with the subject of those infinitives; but of course the supine remains unaltered. Thus, in the second example, victūrūm is in the accusative masculine singular, to agree with sē, the subject of the infinit-ve.
- 359. Two or more English sentences, joined by the conjunction that, are often made one Latin sentence, by leaving out the conjunction, and turning the following nominative into the accusative and the verb into the infinitive.

LESSON LXII.

Participles.—Ablative Absolute.

- 362. The participle is that part of the verb which has the form and inflection of an adjective.
- 363. A verb may have four participles, viz.: the present and future in the active voice, and the perfect and future in the passive.
 - 364. The participles are formed as follows:
 - 1) The present active in the four conjugations, by the addition of the respective endings:

ans, ens, ens, iens, to the first root; as,

Amans (loving), monens, regens, audiens.

- 2) The future active, from the third root, by the addition of the ending ūrŭs (ă, ŭm) (302); as, Amātūrŭs (about to love), mŏnĭtūrŭs, rectūrŭs, audītūrŭs.
- 3) The perfect passive, from the third root, by the addition of the ending ŭs (ă, ŭm) (302); as, Amātŭs (loved), mŏnĭtŭs, rectŭs, audītŭs.
- 4) The future passive in the four conjugations, by the addition of the respective endings:

1. 2. 3. 4. andŭs, endŭs, endŭs, iendŭs, to the first root; as,

Amandūs (deserving to be loved), monendūs, regendūs, audiendūs.

365. The participle in ns answers to the English participle in ing. The participle in us answers to the English participle in ed, en, t, &c.

The participle in dus must be translated by the present infinitive passive, as used with a substantive. (A termination to be desired; a crime to be abhorred.)

The participle in rus must be translated by 'about to (write); or, 'going to (write).'

366. RULE OF SYNTAX.—A noun and a participle standing grammatically independent of the rest of the sentence are put in the ablative (called absolute); e.g.,

Caesăr, victīs $\begin{cases} \textit{Eng. Id., Caesar naving conquered} \\ \text{his enemies.} \\ \textit{Lat. Id. Caesar his enemies being} \\ \text{conquered.} \end{cases}$

367. The want of a participle for the perfect active is supplied by the ablative absolute, or by quum (when) with the perfect or pluperfect subjunctive. The perfect subjunctive must be used, if the other verb is in the present tense; e. g.,

Caesar having conquered {Caesar, quum vīcisset hostes. his enemies, {Caesar, victīs hostībus.

368. Vocabulary.

Aequitas, ātīs, equity, justice.
Angustiae, ārūm (pl.), a narrow pass, defile.

prěhens, to seize, catch.

LESSON LXIII.

Gerunds and Supines.

370. The Gerund is that part of the verb which corresponds to the participal substantive in ing in English.

371. The gerund is really a verbal substantive of the neuter gender, used only in the genitive, dative, accusative, and ablative singular.

Rem.—The infinitive supplies the place of the nominative of the gerund, as that is sometimes used as the subject of a verb (184).

372. The genitive of the gerund ends, in the four conjugations, respectively in

1. 2. 3. 4. andī, endī, iendī.

Amandī (of loving), monendī, regendī, audiendī.

373. The gerund is declined in the parts in use precisely like a neuter noun of the second declension; e. g.,

Gen. Amandī, of loving.

Dat. Amando, to or for loving.

Acc. Amandum, loving.

Abl. Amando, by loving.

Rem.—The gerund, being a part of the verb, of course governs the same case.

374. RULE OF SYNTAX.—The gerund is governed like a noun in the same case; e. g.,

Inter lūdendum.
(During playing.)
While they are playing.

375. The Latin verb has two supines; one in $\bar{u}m$ and one in \bar{u} .

376. The supines are formed by adding the above endings to the third root; e.g.,

Amātum (to love), monitum, rectum, audītum. Amātu (to be loved), monitu, rectu, audītu.

Rem.—The supine in $\bar{u}m$ is generally Englished by the present infinitive active, and that in \bar{u} by the present infinitive passive, though it may be translated by the active, if that gives better English. Both supines are really active; thus, $fact\bar{u}m$ means $for\ doing$, and $fact\bar{u}$ in doing.

377. Rule of Syntax.—The supine in $\check{u}m$ follows verbs of motion, to express the purpose or object of that motion; e.g.,

Mittǐt lēgātōs pācĕm pĕtītĭm. He sends ambassadors to sue for peace.

378. Rule of Syntax.—The supine in \bar{u} is used after adjectives signifying good or bad, easy or difficult, agreeable or disagreeable, &c.; e. g.,

Diffĭcĭlĕ est dictū. It is difficult to say.

379. Rule of Syntax.—Many adjectives signifying desire, knowledge, skill, participation, recollection, fulness,

and the like, together with their contraries, govern the genitive; e.g.,

Cŭpĭdŭs laudĭs, desirous of praise.

380. Vocabulary.

LESSON LXIV.

(Lat.) Consĭliŭm scrībendi ĕpistŏlăm.

(or) Consĭliŭm scrībendae ĕpistŏlae.*

383. Thus, then, *ĕpistŏlă scrībendā* may be declined throughout.

LESSON LXIX.

Verbs with the Dative.—Indirect Object.

396. The use of the *indirect object* has been already illustrated; but as some verbs in Latin are followed by the dative (the case of the indirect object) where we use no preposition, and should therefore be led by the English to put the accusative, it may be well to notice a few instances of this. The verbs of this class are principally such as signify:

To command or obey, please or displease, favor or injure, serve or resist, together with to indulge, spare, pardon, envy, believe, persuade.* Rem. 1.—Văcărě (to have leisure) and nuběrě (to marry, used of females), also take the dative.

Rem. 2.—It will be readily perceived, in most cases, that the dative after the above verbs is really the indirect and not the direct object; thus, imperare (to command) means to give a command to; placere (to please) to give pleasure to; and so of most, if not all, of the others.

 - 1) Loquens, speaking; 2) locutus, having spoken; 3) locuturus, about to speak; 4) loquendus, to be spoken.
 - Rem.—The past participle of a deponent verb is the participle of the *participle active*, which other verbs do not have.
- 401. RULE OF SYNTAX.—The deponent verbs, ūtŏr, fruŏr, fungŏr, potiŏr, vescŏr, dīgnŏr, and their compounds, usually take the ablative; e. g.,

Völuptātĕ fruĭtŭr, he enjoys pleasure.

- Rem.—The ablative after the above is not strictly the object, but the ablative of means; thus, to enjoy pleasure, is to be delighted with pleasure.
- 402. RULE OF SYNTAX.—Verbs of reminding, remembering, forgetting, and pitying, usually take the genitive of the object remembered, forgotten, &c.; e. g.,

Reminiscor beneficii tui, I remember your kindness.

Rem.—Most of these verbs, except those signifying to pity, sometimes take the accusative instead of the genitive.

LESSON LXXI.

Irregular Verbs.

405. The irregular verbs are those which deviate from the ordinary rules, not only in the formation of their roots, but also in the inflection of some of their tenses.

406. The irregular verb possě (to be able), compounded of pot (potis, able) and essě (to be), is conjugated like the simple essě, except,

1) T before s becomes s; as, possum (potsum).

2) The f in the second root is dropped; as, pŏtu (potfu).

3) In the present infinitive and imperfect subjunctive there is a contraction; as, posse (for potesse), possem (for potessem).

407. Paradigm.

Possě, to be able; 2d root, potu.

Pres. Possum, potes, potest, possumus, potestis, possunt.

408. The various forms of posse are often best translated by the auxiliaries, can, could, &c.; e. g.,

Egŏ făcĕrĕ possum, I can do (am able to do).

Rem.—When a past tense of posse is thus translated by could, any present infinitive depending upon it must be translated by the English perfect; e. g.,

Egŏ făcĕrĕ pŏtuī, I could have done.

409. The irregular verb vellě, to will, or be willing, and its compounds, nollě, to be unwilling (from non and vellě), and mallě, to wish rather, to prefer (from måg [mågis, more] and vellě), are conjugated as in the following:

Periphrastic Conjugations.

424. There are two periphrastic conjugations formed respectively from the future participles in $r\breve{u}s$ and $d\breve{u}s$, combined with the various tenses of the verb esse. The first periphrastic conjugation represents the action as future, or as one that is about to be done; e. g., Scriptūrus sum, I am about to write.

425. The second periphrastic conjugation expresses duty or necessity; e. g., Virtūs cŏlendă est, virtue must

be cultivated.

426. Rule of Syntax.—The agent, or person by whom, is put in the dative with the part. in dus; with other words it is generally governed in the ablative by \bar{a} or $\bar{a}b$.

427. RULE OF SYNTAX.—Many adjectives are followed by the dative of the object to which the quality

is directed, or for which it exists; e. g., Pax mihř grātissĭmă ĕrăt, peace was very acceptable to me.

428. VOCABULARY.

Bībĕrĕ, bĭb, bĭbīt, to drink.

LESSON LXXV.

Impersonal Verbs.

430. IMPERSONAL verbs are such as are used only in the third person singular, and never take a personal subject (as *I*, thou, he). The subject in English is generally expressed by the pronoun it; e. g.,

Oportet, it behooves.

Taedet me, it disgusts me (I am disgusted with).

431. Besides the verbs which are strictly impersonal, many others are often used *impersonally*; e. g.,

Constăt, it is known. Juvăt, it delights.

432. The impersonal verb licet, it is lawful, or is allowed, denotes permission, and may be translated by may and might; e. g.,

Lĭcĕt, may (it is allowed). Lĭcuĭt, might (it was allowed).

Mihĭ īrĕ lĭcĕt, I may go. Tĭbĭ īrĕ lĭcĕt. You may go. Illī īrĕ lĭcĕt. He may go. Nobis īre licet. We may go. Vobis ire licet, You may go. Illīs īrĕ lĭcĕt, They may go. Mihř īrĕ lĭcuĭt, I might have gone. Tĭbĭ īrĕ lĭcuĭt, You might have gone.

REM. 1.—The dative in these examples is the indirect object after Netl.

REM 2.—The present infinitive must be translated by the English perfect after Neult, might, as in the above examples. (See also 408, Rem.)

(Eng.) I may go. (Lat. Id.) It is allowed me to go. (Eng.) I might have gone. (Lat. Id.) It was allowed me (then) to go.

433. The impersonal verb oportet, it behooves, denotes duty or propriety, and may be translated by ought; e.g.,

> Mē īrĕ ŏportĕt, I ought to go. Tē īrĕ ŏportĕt, &c. You ought to go. Mē īrĕ ŏportuĭt, I ought to have gone. Tē īrĕ ŏportuĭt, You ought to have gone.

REM. 1.—Observe that here, too, the present infinitive is to be trans lated by the perfect after a past tense.

REM 2 — The infinitive after opportet takes a subject accusative.

434. English.

(a) I repent of my folly, I am vexed at my folly, I am ashamed of my folly, I pity the poor, I am weary of life,

(b) Mē meae stultītiae poenītēt, I repent of my folly. Mē meae stultītiae pīgĕt, Mē meae stultītiae pūdět, Misěrět mē paupěrům, Taedět mē vītae,

Latin Idiom.

It repents me of my folly. It vexes me of my folly. It shames me of my folly. It pities me of the poor. It irks me of life.

I am vexed at my folly. I am ashamed of my folly. I pity the poor. I am weary of life.

435. Rule of Syntax.—The impersonal verbs of feeling, miseret, poenitet, pudet, taedet, and piget, take the accusative of the person, together with the genitive of the object which produces the feeling. (See examples above.)

436. Vocabulary.

Adesse, adfu, to be present. Amīcītiă, ae, friendship. Constăt, it is known, is an admitted fact.

Dīligens, entis, diligent. Hăbitare, av, at, to inhabit, dwell, Immortalis, ĕ, immortal. Licet, it is lawful, is permitted.

ret, I pity you. Oportet, it behooves, one ought. Piget, one is grieved at; me piget, I am grieved. Poenitet, it repents, one repents. Praestăt, it is better.

Miseret, one pities; tui me mise- | Recipere (io), cep, cept, to receive. Saepě, often. Sonus, I, sound, noise. Tardus, a, um, slow. Vēlox, ocis, swift.

Ought not Caius to have been condemned to death? 9. I have received many letters from you. 10. The bird has flown away from my hands.

LESSON LXXVI.

Impersonal Periphrastic.

438. The second periphrastic conjugation is often used impersonally; e. g.,

Mihř scrībendum est, Tibi scrībendum est, Illī scrībendum est, Nobīs scrībendum est, Vobīs scrībendum est, Illīs scrībendum est,

I must or should write. you must or should write. he must or should write. we must or should write. you must or should write. they must or should write.

- 439. Here too the agent is put in the dative (see 426) when expressed. It is omitted:
 - 1) When it means every body or people in general, though it may be translated by we or you; e g.,

Edendum est, we or you (every body) must eat.

- 2) When the persons meant are not likely to be mistaken.
- 440. In the impersonal periphrastic construction, if the verb is one which governs a dative (396), its agent (the person by whom) must not be expressed; e. g.,

Crēdendum est Caiō.

We must believe Caius (not, Caius must believe).

Rem.—If, in any instance, it is necessary to express the agent, it must either be done by means of the ablative with \bar{a} or $\check{a}b$, or the form of the expression must be changed. The two datives would leave it doubtful which was the agent.

441. VOCABULARY.

LESSON LXXVII.

If he has any thing, he will give it.

REM.—Here sī quid habeat is the condition, and dabis the consequence.

486. Conditional sentences are of three kinds:

Sī quǐd hăbět, dăt.

If he has any thing, he gives it.

2) Those which represent the condition as possible; e. g.,

Sī quid hăbeăt, dăbit.

 - 1. Sī quid hăbērĕt, dărĕt.

If he had any thing, he would give it.

Sī quid hăbuissĕt, dĕdissĕt.
 If he had had any thing, he would have given it.

487. It must be observed:

1) That the condition is expressed in the first of the above classes by the *indicative*, in the second by the *subjunctive present* or *perfect*, and in the third by the *subjunctive imperfect* or *pluperfect*.

- 2) That the consequence is expressed in the first two of these classes by the indicative (or sometimes by the imperative), and in the third by the subjunctive imperfect or pluperfect.

LESSON LXXXVIII.

Composition of Words.

550. Prepositions often enter into composition with other words, as prefixes.

Rem.—Many prepositions undergo no change of form on entering into composition, and merely impart to the simple word their own force. These, of course, require no special notice; others, however, present some peculiarities.

- A, ăb, abs = away from; e. g., abstinērē (abs and těnērě), to abstain from. In substantives and adjectives, it denotes privation; e. g., āmens (ā and mens), without mind, mad.
- Ad = to (d often assimilated before consonants, except d, j, m, and v); e. g., accipere (ad and căpere), to accept.
- 3) Cŏn (căm) = with, together, sometimes completely (co before h and vowels; com before b, p, and sometimes before a vowel; n assimilated before l, m, and r); e. g., condūcĕrĕ (con and dūcĕrĕ), to lead together, collect.
- 4) Dē = from, down; e. g., dēdūcĕrē (dē and dūcĕrĕ), to deduce. In substantives and adjectives, privation; e. g., dēmens (de and mens), mad.
- 5) E,ex = out of, thoroughly (e before liquids and b, d, g, and v, ef before f); e. g., expugnāre (ex and pugnāre), to vanquish storm.
- 6) In = into, on, against (im before b and p; i before gn; n as similated before l, m, and r); e.g., incurrere (in and currere).

to attack. In adjectives, not; e. g., indīgnūs (in and dignus), unworthy.

 Ob = against (b assimilated before c, f, and usually p); e. g., opponere (ob and ponere), to place against, to oppose.

8) Pro=for, forth (prod before vowels); e. g., proponere (pro

and poněre), to set forth, propose.

9) Sub = under, from below, somewhat (b assimilated before c, f, g, and sometimes m, p, and r; sus in a few words); e. g, subjicere (sub and jacere), to throw under, to subject

551. The inseparable prepositions, amb, around, about; $d\tilde{\imath}s$ or $d\tilde{\imath}$, asunder; $r\tilde{e}$ ($r\tilde{e}d$ before vowels), back, again, away; $s\tilde{e}$, without, apart from; and $v\tilde{e}$, not, often occur as prefixes in compound words; e. g., $a:nb\tilde{\imath}r\tilde{e}$ (amb and ire), to go round; $disp\tilde{\imath}n\tilde{e}r\tilde{e}$ (dis and poněre), to put asunder, to distribute; $r\tilde{e}d\tilde{\imath}r\tilde{e}$ (red and ire), to return; $s\tilde{e}d\tilde{\imath}u\tilde{c}\tilde{e}r\tilde{e}$ (se and ducěre), to lead apart; $v\tilde{e}s\tilde{a}n\tilde{\imath}u\tilde{s}$ (ve and sanus), not sane, insane.

552. Adverbs are sometimes used as prefixes; e. g., běněvělens (bene and volens), benevolent; mělěvělens

(male and volens), wishing ill, malevolent.

553. Certain vowel-changes often take place in forming compound words; thus, a, e and ae are often changed into i (a sometimes into e); e. g., accipere (ad and capere), abstinēre (abs and tenēre), occīdere (ob and caedere).

Rem. 1.—Having examined the prefixes, we pass to notice a few terminations of frequent occurrence in compound words.

Rem. 2.—When the first part of a compound is a noun, the connecting vowel is generally short i, as in agricola (ager and colere), a husbandman.

^{*} There are only two nouns of this ending, one of which belongs to Class II.

573 CLASS III. comprises nouns of the third declension in bs, ms, p, x (= cs or gs), is, ys, e, a few in i,* and a few in es. They form the root by dropping the nominative ending.

- Nouns in bs, ms, ps, and ys, drop s; as, urbs, a city; root, urb; hiems, winter; root, hiem.
- Nouns in x (= cs or gs) drop the s in x; as, vox (cs), a voice; root, voc; rex (gs), a king; root, reg.
- Nouns in is, e, and a few in es, drop those endings; as, hostis, an enemy; root, host: nūbēs, a cloud; root, nūb: mărē, a sea; root, măr.
- 574. Class IV. comprises nouns of the third declension in as, os, us, ls, ns, rs, and most of those in es. These form the root by changing s into r, t, or d.
 - Nouns in as, ls, ns, rs, and most of those in es, generally change s into t; as, piĕtās, piety; root, piĕtāt: mons, a mountain; root, mont: ăbiēs, a fir-tree; root, ăbiĕt: mīlĕs, a soldier; root, mīlīt. (See Rem. 2, below.)

REM. 1.—Masculines in as, of Greek origin, insert n before t in the root; as, ēlēphās, an elephant; root, ēlēphant.

REM. 2.—Many nouns in es change e into i, before t, in the root; as, milēs; root, milit.

2) Nouns in os and us generally change s into r or t; as, flōs, a flower; root, flōr: săcerdōs, a priest; root, săcerdōt: virtūs, virtue; root, virtūt: gĕnūs, a kind; root, gĕnĕr: tempūs, time; root, tempŏr.

REM. 1.-Most adjectives in er drop e before r of the root in all genders.

REM. 2.—The following adjectives have the genitive singular in iis (the i is generally short in alterius), and the dative singular in i in all genders, viz.: alius, another; nullus, no one; solus, alone; tolus, the whole; ullus, any; unus, one; alter, the other; neuter, neither; and uter, which (of the two).

581. Adjectives of the Third Declension.

1. Adjectives of the third declension may be divided into three classes, viz.:

^{*} The declensions of the different genders are here indicated by numerals.

[†] In adjectives in $\tilde{\epsilon}r$, the masc. nom. sing. is generally the root ($\tilde{\epsilon}$ is sometimes dropped): $\tilde{\epsilon}r$, therefore, is not properly a case-ending; it is given merely to show the termination of the nom. and voc. sing., without regard to the root (107).

[‡] See list, 113, REM.

- Those which have three different forms in the nominative singular (one for each gender).
- 2) Those which have two (the masc. and fem. being the same).
- 3) Those which have but one (the same for all genders).
- 2. Adjectives of the third declension are declined in their several genders like nouns of the same declension, gender, and ending. It must, however, be observed,
 - That those which have only one form in the nominative singular have the abl. sing. in ĕ or ī, and the rest, with the exception of comparatives, in ī only.
 - That all except comparatives have, in the plural, the nom-acc., and voc. neuter in iă, and the genitive in iăm.

III. The Intensive Pronoun, ipsě, himself, is so called because it is used to render an object emphatic. It is declined as follows:

	Singular.		1	Plural.	
M.	F.	N.	M.	F.	N.
N. Ipsě,	ipsă,	ipsŭm.	Ipsī,	ipsae,	ipsă.
G. Ipsīŭs,	ipsīŭs,	ipsīŭs.	Ipsorum,	ipsārum,	ipsörum.
D. Ipsī,	ipsī,	ipsī.	Ipsīs,	ipsīs,	ipsīs.
A. Ipsum,	īpsăm,	ipsŭm.	Ipsös,	ipsās,	ipsă.
V.		_	'	-	-
A. Ipsō,	ipsā,	ipsō.	Ipsīs,	ipsīs,	ipsīs.

IV. The Relative Pronoun, $qu\bar{\imath}$, who, is so called because it always relates to some noun or pronoun, expressed or understood, called its antecedent. It is declined as follows:

	Singular.		1	Plural.	
M.	F.	N.	M.	F.	N.
N. Quī,	quae,	quŏd.	Quī,	quae,	quae.
G. Cujŭs,	cujŭs,	cujŭs.	Quōrŭm,	quārŭm,	quōrŭm.
D. Cuī,	cuī,	cuī.	Quĭbŭs,	quĭbŭs,	quibŭs.
A. Quěm,	quăm,	quŏd.	Quōs,	quās,	quae.
V.	-	-		-	-
A. Quō,	quā,	quō.	Quĭbŭs,	quĭbŭs,	quĭbŭs.

V. The Interrogative Pronouns, $qu\bar{s}$ and $qu\bar{\imath}$, are so called because they are used in asking questions. $Qu\bar{\imath}$ (which? what?) is used adjectively, and is declined like the relative. $Qn\bar{s}$ (who? which? what?) is generally used substantively, and is declined like the relative, except in the forms $qu\bar{s}$, nom. masc., and $qu\bar{u}l$, nom. and acc. neut.

VI. Indefinite Pronouns are so called because they do not definitely specify the objects to which they refer; e. g., $qu\bar{\imath}d\check{u}m$, a certain one; $\check{a}l\check{\imath}qu\check{\imath}s$, some one; $quisqu\check{\imath}e$, every one; $s\bar{\imath}qu\check{\imath}s$, if any, &c. They are compounds either of $qu\check{\imath}s$ or $qu\bar{\imath}e$, and are declined in nearly the same manner as the simple pronouns.

REM.—The compounds of quis generally take quid in the neut. sing. when used substantively, and quod when used adjectively. Some of those compounds, as aliquis, siquis, take quo (not quae) in the fem. sing. and neut. plur.

600. Periphrastic Conjugations.

There are two periphrastic conjugations formed respectively from the future participles in rus and dus, combined with the various tenses of the verb esse. The first periphrastic conjugation represents the action as future, or as one that is about to be done; e.g., scripturus sum, I am about to write: the second expresses duty or necessity: e.g., virtus colendu est, virtue must be cultivated.

601. Impersonal Verbs.

1. Impersonal verbs are such as are used only in the third person singular, and never take a personal subject (as I, thou, he). The subject in English is generally expressed by the pronoun it; e.g.,

Oportět, it behooves.

Taedet mē, it disgusts me (I am disgusted with).

2. Besides the verbs which are strictly impersonal, many others are often used *impersonally*; e. g.,

Constăt, it is known. Juvăt, it delights.

3. The second periphrastic conjugation is often used impersonally; e. g.,

Mihi scribendum est, I must or should write.
Tibi scribendum est, you must or should write.
Illi scribendum est, he must or should write.
Nobis scribendum est, we must or should write.
Vobis scribendum est, you must or should write.
Illis scribendum est, they must or should write.

4. Those verbs which take no direct object in the active, can only be used impersonally in the passive; e. g.,

Mihi crēdītūr, I am believed.
Tibī crēdītūr, Thou art believed.
Illī crēdītūr, He is believed.
Nobīs crēdītūr, We are believed.
Vobīs crēdītūr, You are believed.
Illīs crēdītūr, They are believed.

SYNTAX.

INTRODUCTION.

- 602. Parts of speech (as we have seen, 2), either singly or combined, form propositions; e. g., Amas, thou lovest; puer ludit, the boy plays.
- 603. Propositions, either singly or combined, form sentences; e. g., Equüs currit (one prop.), the horse runs; Puër lūdit ět ĕquüs currit (two propositions).
- 604. Sentences, in their various forms and combinations, of course, comprise the language.
 - 605. Sentences may be divided into two classes, viz.:
 - Simple sentences, or such as contain a single proposition;
 e. g., Puĕr ludit.
 - Compound sentences, or such as contain more than one proposition; e. g., Puer ludit et equus currit.
- 606. In a compound sentence, the propositions which compose it are either,
 - Independent of each other, as in the above example, and are called co-ordinate propositions; or,
 - 2) One of them is used to qualify the other, or some part of it, and is called a dependent or subordinate proposition, while that on which it depends is called a leading or principal proposition; e. g., Servus vēnīt ut portas claudat, the slave has come to shut the gates. Here, 'servus vēnūt' is a principal proposition, and ut portā laudat' is a dependent proposition.

CHAPTER I.

The Essential Elements of Sentences .- Subject and Predicate.

SECTION L-SUBJECT.

- 607. Every sentence, however simple, consists of two distinct parts, viz.:
 - The Subject, or that of which it speaks, as, puer, in the sentence puer ludit.
 - The Predicate, or that which is said of the subject, as lūdūt, in the above sentence.
 - 608. The subject of a sentence must be either,
 - 1) A noun; e. g., puer, in the sentence puer lūdit; or,
 - A word or clause used as a noun; e. g., mentīrī, in the sentence turpē est mentīrī.
- 609. Rule I. The Subject.—The subject of a finite* verb is put in the nominative; e. g., Equus currit, the horse runs.
 - 610. The subject may either be simple or compound.
 - The simple subject consists either of a single nominative, or of two or more nominatives representing the same person or thing; e. g., (1) Lătīnŭs rēgnābăt, Latinus was reigning; (2) Lătīnŭs rex rēgnābăt, Latinus the king was reigning.
 - 2) The compound subject consists of two or more simple subjects connected by conjunctions, expressed or understood; e. g., Caesăr et Balbus Romam venerunt, Caesar and Balbus came to Rome.

SECTION II.—PREDICATE.

- 611. The predicate of a sentence must be either,
 - 1) A verb; e. g., lūdit, in the sentence puer lūdit; or,
 - 2) The verb esse (or sometimes a passive verb) with an attributive; noun or adjective; e. g.,

^{*} For the subject of an infinitive see 655.

[†] By an attributive noun is meant one which is used to qualify or describe another noun.

1.

Cicero fuit consul, Cicero was consul.

Christiani est neminem viölare, it is the duty of a Christian to wrong nobody. Here, fuit consul and Christiani est are the predicates.

2.

Terră est rotundă, the earth is round. Hūmānum est errare, to err is human. Here, est rotundă and hūmānum est are the predicates.

612. Rule II. Finite Verb.—A finite verb must agree with its subject in number and person; e. g., Puĕr lūdīt, the boy plays.

REM.-If the subject is compound, the verb is generally put in the plural.

- 613. Rule III. Attributive Noun.—An attributive noun in the predicate, after the verb esse and a few passive verbs, is put,
 - In the same case as the subject, when it denotes the same person or thing; e. g., Cicero fuit consul, Cicero was consul.
 - In the genitive, when it denotes a different person or thing;
 g., Christianī est nēmīněm viŏlārě, it is the duty of a Christian to wrong nobody.
- 614. Rule IV. Adjectives.—Adjectives and participles (whether in the subject or the predicate) agree in gender, number, and case, with the nouns which they qualify; e.g., Terra est rotunds the earth is round.
- 615. The predicate, like the subject, may be either simple or compound.
 - The simple predicate contains but a single finite verb;
 e. g.. Puer curret, the boy runs.
 - 2) The compound predicate consists of two or more simple predicates connected by conjunctions, expressed or understood; e. g. Puer currit et lūdīt, the boy runs and plays.
- 616. In principal sentences (including simple sentences) the verb of the predicate may be put in any finite mood.
 - The indicative is used, in positive assertions; e. g., Portas claudit, he is shutting the gates.
 - 2) The subjunctive is used,

- a) To express an affirmation doubtfully or conditionally;
 e. g., Dărët, he would give it (i. e., if he had it, perhaps).
- b) Sometimes to express a wish or command; e. g., Scrībăt, he may write, may he write, or let him write.
- The imperative is used to express a command; e. g., Portas claude, shut the gates.
- 617. Rule V. Vocative.—The name of the person or thing addressed is put in the vocative; e. g., Quid est, Cătilină? why is this, Catiline?

REM .- This, of course, forms no part of the subject or predicate.

CHAPTER II.

Subordinate Elements .- Modifiers.

SECTION I .- USE OF MODIFIERS.

- 618. Both subject and predicate may have qualifying words and clauses connected with them, to limit or modify their meaning; e.g.,
 - 1) Lătīnus rex regnavit, Latinus the king reigned. Here the subject is modified by rex (59).
 - Mīlītēs fortītēr pāgnant, the soldiers fight bravely. Here the predicate is modified by fortītēr (77).
- 619. Any modifier, whether in the subject or the predicate, may be itself modified; e.g., Lătīnus, bŏnus rex, rēgnavīt. Here the modifier, rex, is itself modified by bŏnus.
- 620. Nouns, adjectives, verbs, and adverbs, are often found with modifiers.

SECTION II .- MODIFIERS OF NOUNS.

- 621. Nouns, including pronouns, may be modified,
 - I. By adjectives and participles.
 - II. By nouns and clauses used with the force of adjectives.
- 622. I. Nouns may be modified by adjectives and participles; e. g.,
 Bŏnŭs puĕr, a good boy.

 See Rule IV.
- 623. II. Nouns may be modified by nouns and clauses used with the force of adjectives. These are,

- 1) Limiting nouns.
- 2) Relative clauses.
- 624. RULE VI. Limiting Nouns.—A noun limiting the meaning of another noun is put,
 - In the same case as that noun, when it denotes the same person or thing; e. g., Lătīnus rex, Latinus the king.
 - In the genitive, when it denotes a different person or thing; e.g., Rēgis filius, the king's son: except,
 - a) When it denotes character or quality; it is then accompanied by an adjective, and is put either in the genitive or ablative; e. g., Puĕr exĭmiae pulchrĭtūdinis, or Puĕr exĭmia pulchrĭtūdinĕ, a boy of remarkable beauty.
- 625. Rule VII. Relative Clauses.—The relative pronoun agrees with its antecedent in gender and number; e. g., Puer qui lodit, the boy who plays.
- 626. The predicate of a relative clause is sometimes in the *indicative* and sometimes in the *subjunctive*. It may be observed, however, that the subjunctive is used,
 - To express purpose or result; e. g., Lēgātōs mīsērunt quī dīcērent, they sent ambassadors to say (lit., who might say).
 - To define an indefinite antecedent; e. g., Sunt qui putent, there are (some) who think.

SECTION III .- MODIFIERS OF ADJECTIVES.

- 627. Adjectives may be modified,
 - I. By adverbs.
 - II. By words (generally the oblique cases of nouns) used with the force of adverbs.
- 628. I. Adjectives may be modified by adverbs; e.g., Haud difficilis, not difficult.
- 629. Rule VIII. Adverbs.—Adverbs modify verbs, adjectives, and other adverbs; e. g., Haud difficilis, not difficult; mīles fortiter pūgnat, the soldier fights bravely.
 - Rem.—It will be observed that adverbs modify verbs and other adverbs as well as adjectives.
- 630. II. Adjectives may be modified by words (generally the oblique cases of nouns) used with the force of adverbs. These are,

- 1) The genitive.
- 2) The dative.
- The ablative.
- 4) The infinitive.
- 631. Rule IX. Genitive.—Many adjectives signifying desire, knowledge, skill, participation, recollection, fulness, and the like, together with their contraries, take the genitive; e. g., Cŭpídŭs laudīs, desirous of praise.
- 632. Rule X. Dative.—Many adjectives are followed by the dative of the object to which the quality is directed, or for which it exists; e. g., Pax mihī grātissīmā ĕrāt, peace was very acceptaule to me.
- 633. Rule XI. Ablative.—Adjectives may be modified by an ablative denoting cause, manner, or means; e. g., Aeger avaritia, diseased by avarice.
- 634. Rule XII. Ablative.—The adjectives, dīgnus, indīgnus, contentus, praedītus, frētus, and lībēr, take the ablative; e. g., Virtus parvo contenta est, virtue is content with little.
- 635. Rule XIII. Supine in ū as Ablative.—The supine in ū as a verbal noun in the ablative is used after adjectives signifying good or bad, easy or difficult, agreeable or disagreeable, &c.; e. g., Difficile dictū (difficult in saying), difficult to say.
- 636. Rule XIV. Ablative.—The comparative degree without quăm is followed by the ablative; e. g., Clēmentia dīvīniŭs, more godlike than clemency.
 - Obs.—If quām is expressed, the following noun will be in the same case as that which precedes; e.g., Europă minor est quăm Asia, Europe is smaller than Asia.
- 637. Rule XV. Infinitive.—The infinitive sometimes depends upon adjectives; e. g., Dīgnús amarī, worthy to be loved.
 - Rgm.—Infinitives dependent upon adjectives are generally used as substantives, and as such may be referred to Rule XI. or XII.

SECTION IV .- MODIFIERS OF VERBS.

638. Verbs may be modified,

I. By objects.

II. By adverbial modifiers.

§ 1. Objects.

- 639. Verbs may be modified by objects. These are,
 - 1) The oblique cases of nouns.
 - 2) Infinitives or clauses used as nouns.
- 640. Verbs may take one or more oblique cases (f nouns as objects; e. g., (1) Caiŭs puellam laudăt, Caius praises the girl. (2) Balbūs puero viam monstrat, Balbus shows the way to the boy.
- 641. RULE XVI.—The accusative is used as the direct object of an action; e. g., Caius puellam laudăt, Caius praises the girl.
 - 642. Rule XVII.—The genitive is used,
 - 1) After verbs of pitying; e. g., Mīsērēmīnī sŏciōrum, pity the allies.
 - After verbs of remembering and forgetting; e. g., Měmĭnī vivorům, I remember the living.
 - After refert and interest; e. g., Interest omnium, it is the interest of all.

Rem.—Verbs of remembering and forgetting sometimes take the accusative; e.g., Měmĭnī Cinnām, I remember Cinna.

643. Rule XVIII.—The dative is used,

- After esse in expressions denoting possession; e.g., Puero est liber, the boy has a book (lit., there is a book to the boy).
- After the compounds of esse, except posse, to be able;
 e. g., Mihř profuït, it profited me.
- After the compounds of bene, sais, and male; e.g., Officio suo satisfecit, he nas discharged his duty (lit., has done enough for).
- 4) After the compounds of the prepositions, ăd, antě, cŏn, in, intěr, ŏb, post, prae, sŭb, and sŭpěr, together with a few others; e. g., Vēnī ňt mihĭ succurrās, I have come that you may assist (succor) me.
- 5) After verbs signifying to command or obey, please or dis please, favor or injure, serve or resist, together with to indulge, spare, pardon, envy, believe, persuade, &c.; e. g., Lēgibus pārēt, he obeys the laws (is obedient to the laws).

644. Rule XIX.—The ablative is used,

1) After the deponent verbs, ūtī, fruī, fungī, pŏſīrī, vescī,

- dignārī,* and their compounds; e. g., Lacte vescuntur they live upon milk.
- 2) After verbs signifying to abound or be destitute of; e. g₄ Nēmö ăliōrum ŏpē cărērē pŏtest, no one can be (do) without the assistance of others.
- 645. RULE XX. Two Accusatives.—Verbs of asking, demanding teaching, and concealing, may take two accusatives, one of the person and one of the thing; e.g., Caesar frumentum Aeduos flagitabăt, Caesar demanded corn of the Aedui.
- 646. RULE XXI. Accusative and Genitive.—Verbs of accusing, convicting, acquitting, warning, and the like, take the accusative of the person, and the genitive of the crime, charge, &c.; e.g., Caiŭm proditionis accusant, they accuse Caius of treachery.
 - REM.—The genitive is perhaps best explained by making it depend upon the ablative crimine, understood. See 214, Note.
- 647. Rule XXII. Accusative and Genitive.—The impersonal verbs of feeling, miseret, poenitet, pudet, taedet, and piget, take the accusative of the person, together with the genitive of the object which produces the feeling; e. g., Taedet mē vītae, I am weary of life (lit., it wearies me of life).
- 648. Rule XXIII. Accusative and Dative.—Any transitive verb may take the accusative of the direct object and the dative of the indirect object; e. g., Balbus puĕrō viăm monstrăt, Balbus shows the way to the boy.
- 649. Rule XXIV. ELEMENTS OF READING AND ORATORY.	L vol. la	arge	
12mo.		66	1 00

Great pains have been taken to make these books superior to any other reading-books in use, by reducing them to a complete practical system, founded on the nature of the language, by which the proper dellvery of all sentences may be determined, and Reading elevated to the rank of a science. The proper and thorough use of these books places it in the power of every pupil to become an accomplished reader. The selections will be found to contain some of the finest gems in the language, which cannot fail of interesting the pupil, and cultivate soliterary taste.

The First and Second Readers introduce successively the different parts of speech, and are designed to combine a knowledge of their grammatical functions with the meaning and pronunciation of words.

THE THERD AND FOURTH READERS commence with a series of exercises on articulation and modulation, containing numerous examples for practice on the elementary sounds (including errors to be corrected) and on the different movements of the voice produced by sentential structure, by emphasis, and by the passions.

THE COURSE OF READING comprises three parts: the first part containing a more elaborate description of elementary sounds and of the parts of speech grammatically considered, than was deemed necessary in the preceding works; part second, a complete classification and description of every sentence to be found in the English, or in any other language; part third, paragraphs; or sentences in their connection unfolding general thoughts, as in the common reading-books.

The ELEMENTS OF READING AND ORATORY closes the series with an artibition of the whole theory and art of Elocution exclusive of gesture. It contains, besides the classification of sentences, the laws of punctuation and delivery deduced from it, the whole followed by sarefully selected pieces for sentential analysis and vocal practice

RECOMMENDATIONS OF MANDEVILLE'S SERIES OF READERS

That the series is eminently practical and highly approved is shown by the following testimonials, selected from the thousands that have been received from public educators, who have lested them by thorough examination or actual use.

From Walter Bailey, Supt. Public Schools, Fourth District, New Orleans, May 24th, 1952.

"I have examined, with much care and interest, Professor Mandeville's series of feeders, and am much gratified to observe that he has reduced the subject of punctuation and delivery to a complete system; and they possess such superior advantages over any others that I have ever examined, that I have adopted them as text-books in the public schools under my supervision."

** In July, 1852, Mandeville's Reading books were adopted and introduced in all the Public Schools of New Orleans.

The following Resolution was unanimously adopted by the Board of Education of St. Louis, October, 19th, 1852.

Resolved, That Professor Mandeville's Series of Readers be substituted as text-books for Swan's Readers in the Public Schools of this city."

From the late S. L. Holmes, City Superintendent of Schools, Brooklyn.

"Mandeville's Reading Books are used in all of the Public Schools of Brooklyn, and with great satisfaction and profit, both to teacher and pupil. As mere reading books fluey are probably unsurpassed either in matter or system; but as a means of disclosing the true structure of our language, and pointing out the proper mode of parsing it, this series is believed to be altogether unequalled."

PROF. MANDEVILLE'S LECTURES.—"The Committee to whom was intrusted the preparation of an expression of the sentiments of the Teachers of the Public, Ward, Corporate and Private Schools of the City of New York, who have attended Prof. Mandeville's Lectures. "his course on Elocution, respectfully report the following resolutions:

"Resolved, That ...e course of Lectures on Elecution, by Prof. Mandeville, which we have attended, has been to us a source of much gratification and profit,

"Resolved, That his system, based upon sound Philosophical principles, is an easy, progressive, natural, and eminently original method of attaining a knowledge of the classification and structure of every kind of sentence in the English language, with it appropriate punctuation and delivery; and we are happy to say unhesitatingly, that our opinion, his course, if faithfully carried out by teachers as he recommends, is better calculated to make good readers than any other with which we have been acquainted."

The following is signed by all the Principles of the Syracuse Public Schools, except one.

"We, the undersigned, Principals of Public Schools in the City of Syracuse, having formed some acquaintance with Mandeville's System of Reading and Orstory, take occasion cheerfully to express our unfeigned approval and admiration of the same, as the only truly Scientific System known to us, and our belief that its universal introduction into the Public Schools of our country, would prove a very valuable accession to present educational facilities."

12mo. 447 pages. Price \$1 25.

This work is prepared expressly for the use of Classes in schools and the reading circle, and contains a Collection of the most approved Plays of Shakspeare, carefully revised, with introductory and explanatory notes.

"This is a very handsome volume, and it will prove, we believe, a very popular one. Probably no man living is better qualified for the task of preparing a work of this kind than Prof. Hows, who has long been a teacher of elecution, and from his lectures on Shakspeare, has acquired a high reputation for his masterly analysis of the great dramatist. The only fault that we find with his book is that he has left out the comisports, and has given nothing of Falstaff. But his reasons for the omission are sound and onsertiminating."—New York Mirror.

PRIMARY SPELLER AND READER.

BY ALBERT D. WRIGHT.

Price 121 Cents.

This little volume of 144 pages combines a Primary Spelling-book and Reader, happily illustrated with numerous cuts, intended to attract the attention of the young, and to suggest thought for oral instruction and conversation.

It is confidently believed, that the proper use of this little book will obviate most of the difficulties experienced at the commencement of a child's education.

As fast as the letters are learned, an application is immediately made of them.

No word is given in which a letter occurs that has not been previously learned.

The capital letters are taught one at a time, and by review in reading lessons.

The words are systematically presented, being classified by their vowel sounds and terminating consonants; and generally, at the end of each class, they are arranged into little spelling lessons.

The learner is immediately initiated into reading lessons, composed of words of two or three letters, and is then led progressively into more difficult words.

"This is an excellent little book for children, and an improvement on all other Primary Lessons"—N. Y. Observer.

"We most heartly commend it to the favorable regard of teachers and parenta."[eachers' Advocate.

CLASS-BOOK OF POETRY.

BY ELIZA ROBBINS.

Containing a judicious, beautiful, and interesting Collection of Poetry for the Use of Children in Schools, and private reading. 12mc.

16mo. 252 pages. Price 75 cents.

Extract from the Author's Preface.

"In no way is a graceful and refined style of speech so naturally formed as by poetic language made thoroughly familiar to the young. 'I do not like poetry; I cannot understand it,' often say half-taught children. Give them the poetry of good writers, with a little necessary comment, and you will remove all obscurity from the most instructive and effective poetry, and all distaste to it. I have endeavored to do this in the following collection, and I trust that while it exhibits 'only things pure,' 'lovely, and of good report,' it may also give much pleaure, and be serviceable accordingly."

GUIDE TO KNOWLEDGE.

By Eliza Robbins. 16mo. 400 pages. Price 63 cents.

This contains a large amount of useful information, communicated in an entertaining and easy style of familiar questions and answers on every-day subjects, such as children are constantly asking questions about.

"The basis of this work is the 'Child's Guide to Knowledge—an elementary book which has been much used in England for many years, and is particularly adapted to our own country and nation. It commences with questions and answers on those elementary topics which occupy the attention of the young mind, and ranges over the complete circle of useful knowledge. It is a storehouse of various information for the young. We know of no elementary book, that with the necessary aid of judicious in structors, and suitable illustrative helps can be made more useful to youth. Accompanying, is a dictionary of technical terms. We cordially recommend it to the notice of teachers."—Journa. and Messenger.

CLASS-BOOK OF ZOOLOGY.

By Prof. B. Jaeger. 18mo. Price 42 cents.

This work is designed to afford to pupils in common schools and academies a know ledge of the Animal Kingdom, not by making it a thresome study, overloaded with accomprehensible technical terms taken from Latin and Greek, but as a scientification, sinusing, instructive, and useful occupation for the juvenile mind, imparting a taste for callecting and preserving zoological specimens, and furnishing subjects for interesting and elevated observation.

THE CHILD'S FIRST HISTORY OF ROME.

BY MISS E. M. SEWELL.

18mo. 255 pages. Price 50 Cents.

In the preparation of this work for the use of children, the authoress has drawn her materials from the most reliable sources, and incorporated them into a narrative at once unostentatious, perspicuous, and graphic, siming to be understood by those for whom she wrote, and to impress deeply and permanently on their minds the historical facts contained in the book. The entire work is clothed in a style at once pleasing and comprehensible to the juvenile mind.

The author of this work has been very successful in her style of narration, as well as gone to the best sources accessible for her facts. While there is nothing light and trivial in her manner, there is all the vivacity of the most lively fireside story-teller; and those things, "of which it is a shame to speak," she gets over with great judgment, delicacy and tact. While it is eminently a child's book, we greatly misjudge if it should not prove a favorite with adults, especially that class who cannot command time to read protracted histories."—Christian Mirror.

A FIRST HISTORY OF GREECE.

BY MISS E. M. SEWELL.

18mo. 355 pages. Price 63 Cents.

This work is designed to impart to young people a more clear and understandable knowledge of Grecian history than is attainable through any of the numerous works on that subject that have been accumulating during the last century. By selecting and presenting clearly and concisely only prominent characters and events, and not overloading and rendering their perusal irksome by a mass of minor details, the authoress has rendered an essential service to the youth of our country.

"Miss Sewell is eminently successful in this attempt to set forth the history of Greece in a manner suited to the instruction of the young. The chronology is lucid, the evenus are well selected, and the narrative is perspicuous and simple. The facts and the method of presenting them are taken mainly from the work of Bishop Thiriwall, an excellent authority, and the work as a whole is the best with which we are acquainted for the use of children in their lessons of Grecian History, whether in the school-rooper the family circle."—Providence Journal.

"She has faithfully condensed her subject, from the Siege of Troy, B. c. 1184, to the destruction of Corinth, and the annexation of Greece, as a province to the Romas Empire, B. c. 141; forming a most excellent outline, to be filled up by the fixture acquisitions of the reader. MANUAL OF GRECIAN AND ROMAN ANTIQUITIES. BY DR. E. F. BOJESEN.

WITH NOTES AND QUESTIONS BY REV. THOMAS K. ARNOLD.

1 Vol. 12mo. 209 pages. Price \$1 00.

The present Manuals of Greek and Roman Antiquities are far stperior to any thing on the same topics as yet offered to the American public. A principal Review of Germany says of the Roman Manual: 'Small as the compass of it is, we may confidently affirm that it is a great improvement on all preceding works of the kind. We no longer meet with the wretched old method, in which subjects essentially distinct are herded together, and connected subjects disconnected, but have a simple, systematic arrangement, by which the reader readily receives a clear representation of Roman life. We no longer stumble against countless errors in detail, which, though long ago assailed and extirpated by Neibuhr and others, have found their last place of refuge in our manuals."

HISTORY OF ENGLAND.

BY MRS. MARKHAM, REVISED BY ELIZA ROBBINS.

12mo. 387 pages. Price 75 Cents.

This work covers a period from the Invasion of Julius Cæsar to the Reign of Victoria, containing questions adapted to the use of schools in this country.

"Mrs. Markham's History was used by that model for all teachers, the late Dr. Arnold, master of the great English school at Rugby, and agrees in its character with his enlightened and pious views of teaching history. It is now several years since I adapted this history to the form and price acceptable in the schools in the United States. I have recently revised it, and trust that it may be extensively serviceable in education.

"The principal alterations from the original are a new and more convenient division of paragraphs, and entire omission of the conversations annexed to the chapters. In the place of these I have affixed questions to every page that may at once facilitate the work of the teacher and the pupil. The rational and moral features of this pook first commended itself to me, and I have used it successfully with my own scholars."—Extract from the American Editor's Preface.

MANUAL OF ANCIENT GEOGRAPHY AND HISTORY

12mo. 396 pages. Price \$1 00.

This work was originally prepared by Wilhelm Pütz, an eminent German scholar, and translated and edited in England by Rev. T. K. Arnold, and is now revised and introduced to the American public in a well-written preface, by Mr. George W. Greene, teacher of modern languages in Brown University.

As a text-book on Ancient History for Colleges and advanced Academies, this volume is believed to be one of the best compands published.

HAND-BOOK OF MEDIÆVAL GEOGRAPHY & HISTORY BY WILHELM PUTZ

1 Vol. 211 pages. 12mo. Price 75 Cents.

The characteristics of this volume are: precisior, condensation, and luminous arrangement. It is precisely what it pretends to be—a manual, a sure and conscientious guide for the student through the crooks and tangles of Mediæval History. All the great principles of this extensive period are carefully laid down, and the most important facts skilfully grouped around them.

MANUAL OF MODERN GEOGRAPHY AND HISTORY. BY WILHELM PUTZ

TRANSLATED BY REV. R. B. PAUL, M. A. 12mo. 336 pages. Price \$1 00.

This volume completes the series of the author's works on geography and history. Every important fact of the period, comprehensive as it is both in geography and history, is presented in a concise yet clear and connected manner, so as to be of value, not only as a text-book for students, but to the general reader for reference. Although the facts are greatly condensed, as of necessity they must be, yet they are presented with so much distinctness as to produce a fixed impression on the mind. It is also reliable as the work of an indefatigable German scholar, for correct information relating to the progress and shanges of states and nations—literature, the sciences and the arts—and all that combines in modern civilization.

A DIGEST OF THE LAWS, CUSTOMS, MANNERS AND INSTITUTIONS OF THE ANCIENT AND MODERN NATIONS.

BY THOMAS DEW.

Late President of the College of William and Mary.

1 Vol. 8vo. 662 pages. Price \$2 00.

On examination, it will be found that more than ordinary labor has been expended upon this work, and that the author has proceeded upon higher principles, and has had higher aims in view than historical compilers ordinarily propose to themselves. Instead of being a mere catalogue of events, chronologically arranged, it is a careful, laborious, and instructive digest of the laws, customs, manners, institutions, and civilization of the ancient and modern nations.

The department of modern history in particular has been prepared with unusual care and industry.

From John J. Owen, Professor in New York Free Academy.

"I have examined with much pleasure Prof. Dew's 'Digest of the Laws, Manners, Customs, &c., of Ancient and Modern Nations.' It furnishes a desideratum in the study of history which I have long desired to see. The manner in which history is generally studied in our institutions of learning, is, in my judgment, very defective. The great central points or epochs of history are not made to stand out with sufficient prominence. Events of minor importance are made to embarrass the memory by the confused method of their presentation to the mind; history is studied by pages and not by subjects. In the wilderness of events through which the student is groping his way, he soon becomes lost and perplexed. The past is as obscure as the future. His lesson soon becomes an irksome task. The memory is wearied with the monotonous task of striving to retain the multitudinous events of each daily lesson.

"This evil appears to be remedied in a great degree by Prof. Dew's admirable arrangement. Around the great points of history he has grouped those of subordinate importance. Each section is introduced by a caption, in which the subject is briefly stated, and so as to be easily remembered. Thus the student having mastered the leading events, will find little or no difficulty in treasuring up the minor points in their order and connection. I trust the book will be adopted in our higher institutions of learning. I greatly prefer it to any history for the use of schools which I have seen."

HISTORICAL AND MISCELLANEOUS QUESTIONS.

BY RICHARD MAGNALL. REVISED BY MRS. LAURENCE.

12mo. 396 pages. Price \$1 00.

The American authoress of this excellent book has made it pecuairly well adapted to the schools of this country by adding to it a chapter on the history and constitution of the United States, and by large additions on the elements of mythology, astronomy, architecture, heraldry, &c., &c. This edition is embellished by numerous cuts, a large portion of the work is devoted to judicious questions and answers on ancient and modern history, which must be very serviceable to teachers and pupils.

r.This is an admirable work to aid both teachers and parents in instructing children and youth, and there is no work of the kind that we have seen that is so well calculated to 'awaken a spirit of laudable curiosity in young minds,' and to satisfy that curiosity when awakened."—Commercial Advertiser.

HISTORY OF ROME.

BY DR. THOMAS ARNOLD,

Three Volumes in One. 8vo. 670 pages. \$5 00

Arnold's History of Rome is a well-known standard work, as full and accurate as Niebuhr, but much more readable and attractive; more copious and exact than Keightley or Schmitz, and more reliable than Michelet, it has assumed a rank second to none in value and im portance. Its style is admirable, and it is every where imbued with the truth-loving spirit for which Dr. Arnold was pre-eminent. For Colleges and Schools this history is invaluable; and for private, as well as public libraries, it is indispensable.

LECTURES ON MODERN HISTORY.

BY DR. THOMAS ARNOLD.

Large 12mo. 428 pages. Price \$1 25.

Edited from the second London edition, with a preface and notes of Henry Reed, M. A., Professor of English Literature in the University of Pennsylvania.

"These lectures, eight in number, furnish the best possible introduction to a philosophical study of modern history. Prof. Reed has added greatly to the worth and interest of the volume, by appending to each lecture such extracts from Dr. Arnold's other writings as would more fully illustrate its prominent points. The notes and appendix which he has thus furnished are exceedingly valuable."—Evening Post.

PHILOSOPHY OF SIR WM. HAMILTON.

EDITED BY O. W. WIGHT.

1 vol. 8vo. 520 pages. Price \$1 50.

This handsome octave volume is issued in a beautiful style, and is designed to be used as a text-book in schools and colleges. It embraces all the metaphysical writings of Sir Wm. Hamilton, one of the most noted philosophers and logicians of the day, whose writings deserve the attention and consideration of those who have charge of curseminaries of learning.

"With the severest logic, and a power of analysis that is well nigh matchless, he unites the most perspicuous and exact style, expressing the nicest shades of thought, with undeviating accuracy. And his writings display remarkable crudition as well as discrimination; he shows himself perfectly familiar with the theories and arguments of all who have gone before him, whether in earlier or later days; and vhile he renders due honor to each, he knows no such thing as being in bondage to a great name."—

HISTORY OF MODERN PHILOSOPHY.

BY M. VICTOR COUSIN.

TRANSLATED BY O. W. WIGHT.

2 vols. 8vo. 891 pages. Price \$3 00.

This is the ablest and most popular of all Cousin's works. It contains a full exposition of Eclecticism, by its founder and ablest supporter; gives a collected account of the history of philosophy from the earliest times; makes a distinct classification of systems, affords brief yet intelligible glimpses into the interior of aimost every school, whether ancient or modern; and a detailed analysis of Locke, which unanswerably refutes a sensualistic theory that has borne so many bitter fruits of irreligion and atheism.

[&]quot;M. Cousin is the greatest philosopher of France."-Sir William Hamilton.

[&]quot;As regards that part of this work—its translation—which has fallen to Mr. Wight, we must say that it has the air of being well performed. We have not the original at hand to compare the two, but the flowing style of the English version demonstrates the translator's familiarity with the foreign language."—Western Lit. Gazette.

FIRST LESSONS IN ENGLISH COMPOSITION.

BY G. P. QUACKENBOS, A. M. 12mo. Price 45 Cents

These "First Lessons" are intended for beginners in Grammar and Composition, and should be placed in their hands at whatever age it may be deemed best for them to commence these branches—say from nine to twelve years. In the first fifty pages, by means of lessons on the inductive system, and copious exercises under each, the pupil is made familiar with the nature and use of the different parts of speech, so as to be able to recognize them at once. He is then led to consider the different kinds of clauses and sentences, and is thus prepared for Punctuation, on which subject he is furnished with well considered rules, arranged on a new and simple plan. Directions for the use of capital letters follow. Next come rules, explanations and examples, for the purpose of enabling the pupil to form and spell correctly such derivative words as having, debarring, pinning, and the like, which are not to be found in ordinary dictionaries, and regarding which the pupil is apt to be led astray by the fact that a change is made in the primitive word before the addition of the suffix. This done, the scholar is prepared to express thoughts in his own language, and is now required to write sentences of every kind, a word being given to suggest an idea for each; he is taught to vary them by means of different arrangements and modes of expression; to analyze compound sentences into simple ones, and to combine simple ones into compound. Several lessons are then devoted to Style. The essential properties, purity. propriety, precision, clearness, strength, harmony, and unity, are next treated, examples for correction being presented under each. The different kinds of composition follow; and, specimens having been first given, the pupil is required to compose successively letters, descriptions, narrations, biographical sketches, essays, and argumentative discourses. After this, the principal figures receive attention; and the work closes with a list of subjects carefully selected, arranged under their proper heads, and in such a way that the increase in difficulty is very gradual. The work has received the universal ar preval of Teachers and the Press throughout the Union.

A DIGEST OF ENGLISH GRAMMAR.

BY L. T. COVELL

12mo. Price 50 Cents

This work, which is just published, is designed as a Text-Book for the use of Schools and Academies; it is the result of long experience, of an eminently successful Teacher, and will be found to possess many peculiar merits.

4t a regular meeting of the Board of Education of Rochester, held June 18, 1858, the following resolution was unanimously adopted:

"Resolved, That Covell's Digest of English Grammar be substituted for Wells' Grammar, as a Text-Book in the public schools of this city, to take effect at the commencement of the next school year."

Extract from the Minutes of a Regular Meeting of the Board of Education of
Troy, May 31st, 1853.

"Mr. Jones, from Committee on text-books, and school librarias, moved, that Bullion's English Grammar be stricken from the list of text-books, and Covell's be substituted.—Passed."

From forty-four Teachers of Public Schools, Pittsburg, Pa.

"The undersigned have examined 'Covell's Digest of English Grammar,' and are of opinion that in the justness of its general views, the excellence of its style, the brevity, accuracy, and perspicuity of its definitions and rules, the numerous examples and illustrations, the adaption of its synthetical exercises, the simplicity of its method of analysis, and in the plan of its arrangement, this work surpasses any other grammar now before the rublic; and that in all respects it is most admirably adapted to the use of schools and academies."

From all the Teachers of Public Schools of the City of Alleghany, Pa.

We, the undersigned, Teschers of Alleghany city, having carefully examined Mr. Co. ell's Digest of English Grammar,' and impartially compared it with other grammar, a now in use, are fully satisfied that, while it is in no respect inferior to others, it is to very many respects much superior. While it possesses all that is necessary for the advanced student, and much that is not found in other grammars, it is so simplified as to adapt it to the capacity of the youngest learner. We are confident that much time and abor will be saved, and greater improvement secured to our pupils in the study of this cience, by its introduction into our schools; nence we earnestly recommend to the Boards of Directors of this city, its adoption as a uniform text-book upon this science in the chools under their direction."

From John J. Wolcott, A. M., Pr. and Supt. 9th Ward School, Pittsburg, Pa.

"'Covell's Digest of English Grammar' not only evinces the most unceasing labor, the most extensive research, the most unrelaxing effort, and the most devoted self-sacrificing study of its author, but it is the most complete, the most perfect, and, to me, the most satisfactory exposition of English Grammar that has come to my notice. It appears to me that every youth aspiring to become master of the English language, from the rudimental principles to the full, round, beautiful, faultless, perfect period, will make this volume his 'vade mecum.'"

EXPOSITION OF THE GRAMMATICAL STRUCTURE OF THE ENGLISH LANGUAGE.

BY JOHN MULLIGAN, A. M.

Large 12mo. 574 pages. \$1 50.

This work is a comprehensive and complete system o English Grammar, embracing not only all that has been developed by the later philologists, but also the results of years of study and research on the part of its author. One great advantage of this book is its admirable arrangement. Instead of proceeding at once to the dry details which are distasteful and discouraging to the pupil, Mr. M. commences by viewing the sentence as a whole, analyzing it into its proper parts, and exhibiting their connection; and, after having thus parsed the sentence logically, proceeds to consider the individual words that compose it, in all their grammatical relations. This is the natural order; and experience proves that the arrangement here followed not only imparts additional interest to the subject, but gives the pupil a much clearer insight into it, and greatly facilitates has progress.

From Dr. JAMES W. ALEXANDER.

"I thank you for the opportunity of perusing your work on the structure of the English language. It strikes me as being one of the most valuable contributions to this important branch of literature. The mode of investigation is so unlike what appears in our ordinary compilations, the reasoning is so sound, and the results are so satisfactory and so conformable to the genius and great authorities of our mother tongue, that I propose to recur to it again and again."

Extract from a letter from E. C. Benedict, Esq., President of the Board of Education of the City of New York.

"I have often thought our language needed some work in which the principles of grammatical science and of the structure of the language, philosophically considered, were developed and applied to influence and control the were and consuedo of Horace and Quintilian, which seem to me to have been too often the principal source of sole-sisms, irregularity and corruption. In this point of view, 1 consider your work a valuable and appropriate addition to the works on the language."

From WM. Horace Webster, President of the Free Academy, New York.

"The exposition of the grammatical structure of the English language by Professor Mulligan, of this city, is a work, in my opinion, of great merit, and well calculated to impart a thorough and critical knowledge of the grammar of the English language.

"No earnest English student can fail to profit by the study of this treatise, yet it is designed more particulary for minds somewhat maturer, and for profils who are complete and have a desire, to comprehend the principles and learn the philosophy of some wantongue."

From C.S. Heney, Professor of Philosophy, History, and Belles-Lettres, in the University of the City of New York.

"Reid's Dictionary of the English Language is an admirable book for the use of schools. Its plan combines a greater number of desirable conditions for such a work, than any with which I am acquainted; and it seems to me to be executed in general with great judgment, fidelity, and accuracy."

From Heney Reed, Professor of English Literature in the University of Pennsylvania.

"Reid's Dictionary of the English Language appears to have been compiled upon sound principles, and with judgment and accuracy. It has the merit, too, of combining much more than is usually looked for in dictionaries of small size, and will, I believe, be found excellert as a convenient manual for general reference, and also for various purposes of education."

HISTORY OF ENGLISH LITERATURE.

BY WILLIAM SPALDING, A. M.

TROFESSOR OF LOGIC, RHETORIC, AND METAPHYSICS, IN THE UNIVERSITY OF ST. ANDREWS

12mo. 413 pages. Price \$1 00.

The above work, which is just published, is offered as a Text-book for the use of advanced Schools and Academies. It traces the literary progress of the nation from its dawn in Anglo-Saxon times, down to the present day. Commencing at this early period, it is so constructed as to introduce the reader gradually and easily to studies of this kind. Comparatively little speculation is presented, and those literary monuments of the earlier dates, which were thought most worthy of attention, are described with considerable fulness and in an attractive manner. In the subsequent pages, more frequent and sustained efforts are made to arouse reflection, both by occasional remarks on the relations between intellectual culture and the other elements of society, and by hints as to the theoretical laws on which criticism should be founded. The characteristics of the most celebrated modern works are analyzed at considerable length.

The manner of the author is remarkably plain and interesting, almost compelling the reader to linger over his pages with tuwearied sugartion.

CLASS-BOOK OF CHEMISTRY.

BY EDWARD L. YOUMANS.

12mo. 340 Pages. Price 75 Cents.

Every page of this book bears evidence of the author's superior ability of perfectly conforming his style to the capacity of youth. This is a merit rarely possessed by the authors of scientific school-books, and will be appreciated by every discriminating teacher. It is especially commended by the eminently practical manner in which each subject is presented. Its illustrations are drawn largely from the phenomena of daily experience, and the interest of the pupil is speedily awakened by the consideration that Chemistry is not a matter belonging exclusively to physicians and professors.

From Prof. Wm. H. Bigelow, Principal of Clinton Street Academy.

"The eminontly practical character of the Class-Book treating of the familiar applications of the science, is in my opinion its chief excellence, and gives it a value far superior to any other work now before the public."

From DAVID SYME, A. M., formerly Principal of the Mathematical Department, and Lecturer in Natural Philosophy, Chemistry and Physiology, in Columbia Col.

"Mr. Youmans: Dear Sir,—I have carefully examined your Class-Book on Chem istry, and, in my opinion, it is better adapted for use in schools and academies than any other work on the subject that has fallen under my observation.

"I hope that the success of your Class-Book will be proportionate to its merits, and that your efforts to diffuse the knowledge of Chemistry will be duly appreciated by the friends of education."

"Either for Schools or for general reading, we know of no elementary work on Chemistry whic's n every respect pleases us so much as this."—Com. Advertiser.

CHART OF CHEMISTRY.

BY EDWARD L. YOUMANS.

Youmans' Chart of Chemistry" accomplishes for the first time, for chemistry, what maps and charts have for geography, astronomy, geology, and the other natural sciences, by presenting a new and admirable method of illustrating this highly interesting and beautiful science. Its plan is to represent chemical compositions to the eye by colored diagrams, the areas of which express proportional quantities.

CLASS-BOOK OF PHYSIOLOGY.

BY B. N. COMINGS, M. D.

12mo. 270 pages. Price 90 Cents.

This volume, which is well adapted to the wants of schools and scademies, has been prepared from the "Principles of Physiology, by Comings and Comstock, and is brought out in its present form at the urgent request of numerous friends of education who have highly commended that work, which was found too expensive for general use in the school-room.

It will be found to explain and illustrate fully and clearly as many principles of physiology as can be expected in a work of its limit. That human physiology can be made more easy of comprehension, more profitable, and more attractive to the beginner of the study, by appropriate references to the comparative physiology of the inferior animals, than by any other method, is an established fact in the mind of the author, which he has made eminently available in the preparation of this work, thus giving to this work peculiar claims to the attention of teachers.

The work is illustrated by 24 plates and numerous wood-engravings, comprising in all over 200 figures.

COMPANION TO ABOVE. (In Press.) Containing illustrations and Questions.

COMMON SCHOOL PHYSIOLOGY. Dr. Comings. (NEARLY READY.)

From Abraham Powelson, Jr., Teacher, No. 204 Schermerhorn Street, Brooklyn,

New York.

"After a very careful examination of the Class-Book of Physiology, by Comings, I can freely say that I consider it a performance of superior excellence. It embodies a fund of information surpassing in importance and variety that of any other work of the kind which has come under my no "ace."

From Andrew J. Welles, Glastonbury, Conn.

"It appears to me to be admirably adapted to the purpose for which it was designed, and I think will readily be admitted into our schools."

"The illustrations are more complete, and in a style superior to any I have ever seen in a school-book, making it really attractive to the eye."

From WM. D. SHIPMAN, East Haddam, Ct.

"Please accept my thanks for a copy of your 'Class-Book of Physiology, by Dr Comings.' I have given the work a somewhat careful examination, and am very strongl impressed with its value as an elementary work for schools and families. It contains a simple and lucid exhibition of the subject upon which it treats, and illustrates the beinees by a great amount of instructive and curious information, which cannot fail to make it an attractive book for ingenious young persons."

MANUAL OF ELEMENTARY GEOLOGY

BY SIR CHARLES LYELL, M. A., F. R. S. 1 Vol. 8vo. 512 pages. Price \$1 75.

This is a reprint of the fourth London edition of a work of distinguished reputation, beautifully illustrated by Five Hundred Woodcure. Being the production of a writer who stands at the head of the department of knowledge which he has undertaken to explain, is sufficient guaranty for the invaluable character of the work for the scientific reader and observer, as well as for general use in our seminaries of learning.

"There is no branch of natural science where there is a more quickly recurring necessity for new editions of elementary books, than Geology. It is itself but the germ of a science, daily gathering fresh facts and extending its jurisliction over rew fields of observation. What was a satisfactory account of its discoveries a few years ago, is now obsolete. And among the scholars and observers who have done most to advance the science, and are most competent to elucidate its present condition, is the author of the volume before us."—Charleston Mercury.

PRINCIPLES OF GEOLOGY.

BY SIR CHARLES LYELL, A. M., F. R. S. 1 Vol. 8vo. 834 pages. Price \$2 25.

"This is a noble volume of over 800 pages, 8vo., on fair paper, in clear type, and abundantly illustrated with maps, engravings and woodcuts—an honor to the publishers who have issued it, and speaking well for the progress in scientific studies in this country—inasmuch as it would not be re-published, without a fair prospect of a remunerating sale. It is a book that we cannot pretend to review; but we take pleasure in announcing its appearance as a work which those of our readers interested in the growing, and in many respects very practical science of geology, will be glad to see. The author stands among the foremest of those who have devoted themselves to reading the history of the earth as written in and upon its own boson."—Christian Register.

"It will only be necessary to announce this new and handsome edition of Lyell's standard work on geology, to induce all lovers of this most instructive science, to secure a copy of the work, if possible; for every successive edition of such a work has a value which none of its predecessors had, inasmuch as new discoveries are being constantly made by the active author, and other distinguished geologists, which illustrate topics

discussed in the work,"-Boston Traveller.

GREEN'S BOTANY.

QUARTO. BEATIFULLY ILLUSTRATED.

Designed for the Use of Schools.

(NEARLY READY.)

FIRST LESSONS IN GEOMETRY. BY ALPHEUS CROSSY.

18mo. Price 38 Cents.

This little mathematical volume is founded upon the model of Colturns First Lessons in Arithmetic, and abounds in illustrative questions both general and numerical, being an attempt to take advantage of their juvenile conceptions of place, form, and magnitude, which the youthful mind conceives most easily and readily, and to give to them a scientific form, and make them the foundation of elevated and accurate attainments—thus rendering Geometrical truths simpler and plainer, and bringing them within the reach of young children without sacrificing any of that strictness of demonstration which is the peculiar beauty of this science. That the author has been eminently practical and successful in this attempt will be seen by reference to the book.

FIRST LESSONS IN BOOK-KEEPING.

SINGLE AND DOUBLE ENTRY.

BY JOS. H. PALMER, A.M.

12mo. Price 19 Cents.

This little volume is progressively and logically arranged; each principle is clearly set forth by itself and illustrated, 1st, by "Slate Exercises," and 2d, by "Blank-Book Exercises." The practice is thoroughly taught by numerous exercises, in which the pupil opens the accounts and conducts and closes them himself.

BLANKS ACCOMPANYING THE SAME. 19 cents.

TREATISE ON BOOK-KEEPING.

BY JOS. H. PALMER, A. B.

12mo. Price 63 c.

From Jos. McKern, Supt. of Schools of the City of New York.

[&]quot;The arrangement of this work admirably combines the scientific and practical in a system of instruction which appears to be happily matured. It is well considered, and has in it more of original adaptation than is to be ordinarily met with in works upon this subject. I recommend it to the favor of business men and teachers of book keeping."

ARITHMETICAL SERIES.

BY GEO. R. PERKINS, LL. D

PRIMARY ARITHMETIC. 18mo. 160 pages. Price 21 Cents.

This work is in two parts. 1st, Intellectual Arithmetic, and 2d, Primary Written Arithmetic. It will be found to contain—

A familiar treatment of the ground rules, and an informal and extended explanation of the principles of Decimals, in connection with exercises in Federal Money.

ELEMENTARY ARITHMETIC. 16mo. 350 pages. Price 42 Cents.

This work is peculiarly adapted to discipline the minds of those who study it.

No principle is left unclucidated, and new light is thrown upon many heretofore imperfectly illustrated.

The subject of Proportion and Ratio is presented with peculiar force; as also, in Equation of Payments, the method of finding the Cash Balance.

The method of Extraction of the Cube Root is greatly preferable to the old method. It is far more concise and more comprehensive saving nearly half the labor, and being applicable, with little variation, to the extraction of all arithmetical roots.

PRACTICAL ARITHMETIC. 12mo. Cloth sides. 354 pages. Price 62 Cents.

The Practical Arithmetic, containing about 4000 examples, is substantially the same as the "Elementary," and is designed for the use of such institutions and schools as require more examples than are given in that work. The almost universal expression of those who have used it is, that "it is the best and most complete arithmetic published."

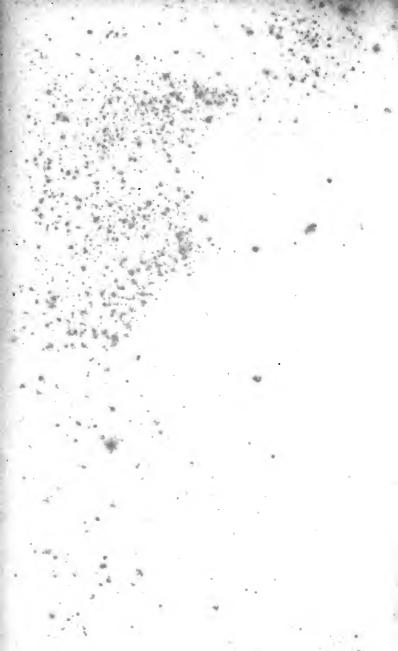

KEY TO THE PRACTICAL ARITHMETIC. 12mo. Cloth sides. 324 pages. Price 75 Cents.

This work, which is just published, contains complete and full solutions to nearly 4000 examples, and is designed for the use of teachers only.

HIGHER ARITHMETIC. 12mo. Sheep. Price 75 Cents.

This work is what its name purports, and develops Arithmetical principles higher than are usually found in other school Arithmetics, and fully explains the science of numbers and their application.
